Hour of Code with Kidzworld & Tynker: December 8-14, 2014

Academic partnership between Kidzworld & Tynker! Our goal is to inspire children & teens to learn with code during **Hour of Code Week!** Last year over 45 million students participated in this worldwide learning phenomenon. This years goal is to have **100 million students** join in worldwide.

Kidzworld - a safe, secure, social network & online magazine for kids and teens is committed to bringing the richest online experience through educational content, games and a robust online community of over 2.3 million monthly users.

"We are delighted to participate in the worldwide Hour of Code initiative", says Kidzworld CEO Allen Achilles *"We strive to offer the highest quality educational content to our users, which is why we chose this opportunity to partner with Tynker, a Company that has a proven track record for exceptional service in the computer science space."*

What is Hour of Code?
The 'Hour of Code' is a global movement inspired by CSEdWeek and code.org to introduce computer programming to tens of millions of students in 180+ countries. This year, 'Hour of Code' will happen in classrooms around the world the week of December 8-14, 2014.

Kidzworld & Tynker, Education Partners
We are pleased to offer students the opportunity to embark on a coding adventure with personalized characters, the opportunity to make animated cards, and to build their own multi-level games. Upholding the quality of Tynker's award-winning courses and apps, all activities for Hour of Code support common standards. Get kids hooked on coding with these easy and fun creative activities.

We are excited that in partnering with Tynker we are able to offer a wide variety of activities that ensure all students no matter how much programming experience they have, will find fun and challenging coding activities. For students who have already started programming, we are able to take them to the next level with new challenges.
