

ETF Trading Mastery: Review Examining Todd Mitchell's Educational Program Released

ETF Trading Mastery reviews have been popping up all over the Internet and ForexVestor.com reveals the truth about this program that claims to take people by the hand and teach them what they need to know for a successful career.

(PRWEB) December 10, 2014

ETF Trading Mastery promises to teach people everything, from the principles of charting to how to maximize their potential. This has caught the attention of ForexVestor.com's Stan Stevenson, prompting an investigative review.

"Our ETF Trading Mastery review shows that while this program could definitely bump up your current game in trading ETFs, you don't need any experience in trading them to take part in it. There are 12 different modules in the program that will take you from beginner to expert in no time," reports Stevenson. "Moreover, if you don't have a lot of extra time, that is not a problem. You don't need to be monitoring your computer all day because there are larger market swings and trade time frames than there is in other markets."

ETF Trading Mastery includes 12 modules in total with PDF's, cheat sheets, tools, guides and over 10 hours of videos included, 4 live coaching sessions, member's area to ask any questions that people need answered when not involved in the live coaching, a 70-page reference guide to help implement and execute every strategy learnt in the training, lifetime updates and access to the members area, monthly get access to a live webinar that will discuss important topics and allow one to ask questions and a trading software that offers a visual aid for everything learnt in the course.

"Created by a man who is passionate about trading, this program includes full training on ETF trading along with notices of trading alerts via email and text messaging, daily updates and strategy review on the weekend, and one training webinar per month that discusses recent trades, current trends and any concerns or questions you may have," says Stevenson. "You will learn how ETFs work, what advantages there are to trading them as opposed to trading in other markets, everything you need to know about 4 key market foundation principles for trading mastery; The Market Flow Analysis Method, Support and Resistance, Fibonacci Retracement and Keltner Channel Bands will all be discussed."

"At the end of the program you will be able to find the hottest trade and be in the market at the right time. That is the beauty of this step-by-step ETF Trading Mastery program; nothing is left untouched and you really become a master. Todd will also teach you the criteria that he uses for trading with the trend in his High Probability Trend Entries module. Here, you will learn

how he sets up his trades and how he enters aggressively or conservatively following a few patterns. Knowing this information about trends will help you experience less stress and more profits. You will also learn about money management in trading and learn a strategy he uses, called the Trade Sizing Strategy, to use the capital that you have available to you. If you are ready to try out ETF trading, then you need to get the program first. If you are going to do it, then you might as well do it right.”
