

LIVING
BUILDING
CHALLENGESM
3.0

Setting the ideal as the
Indicator of Success.

LIVING BUILDING CHALLENGESM is...

A PHILOSOPHY, ADVOCACY AND CERTIFICATION PROGRAM of the International Living Future Institute. It engages the broader building industry in the deep conversations required to truly understand how to solve problems rather than shift them.

AN EVOCATIVE GUIDE. It asks: *What if every single act of design and construction made the world a better place?* It positions the ideal as the indicator of success, and demonstrates that incremental change is no longer a viable option.

A CALL TO ACTION. With a goal to increase awareness, it tackles critical environmental, social and economic problems.

A 'UNIFIED TOOL'. That allows us to envision a future that is Socially Just, Culturally Rich and Ecologically Restorative.

PROVEN PERFORMANCE RATHER THAN ANTICIPATED OUTCOMES Decidedly not a checklist of best practices, it leads teams to embrace regional solutions and respond to place.

A VISIONARY PATH TO A RESTORATIVE FUTURE.SM
