iPatientCare and Scriptel Corporation Partner to Enhance Usability and Enable Paperless Operations in the iPatientCare Application

iPatientCare is now integrated with Scriptel® Corporation's ScripTouch® Signature Pads that allow direct electronic capture of authentic handwritten signatures onto multiple consent forms at Check-In and within Patient Chart modules in the iPatientCare application. This saves time and cost, speeds up patient interactions and reduces errors by removing the need to print documents, get them signed manually and then scan them back in with signatures.

Woodbridge, NJ, December 31st, 2014 - iPatientCare, Inc., a pioneer in mHealth and cloud-based ambulatory EHR and integrated practice management solutions, announced the integration of Scriptel® Corporation's electronic signature pads with iPatientCare EHR and PMS Application.

At iPatientCare National User Conference 2014, Scriptel exhibited and demonstrated its products - a line of 1X5 type electronic signature pads - for iPatientCare EHR and PMS users. In addition to capturing signatures on consents and other documents, the signatures can also be stored in the patient demographics, which provides another way to verify identity in subsequent visits.

Scriptel offers three products that are compatible with iPatientCare: Desktop LCD for typical check-in usage, Compact for portability, and Desktop without LCD for a lower cost option. All three products feature Scriptel's unique EasyScript interface for browser-based applications that eliminates any PC installs to support the signature pads making systems running iPatientCare more secure and reducing software maintenance issues.

"Scriptel signature pads are the most reliable and best supported signature pads in the market today. Our battery-less pen technology was developed for retail applications where frequent use and 24/7 operation are the norm. The rugged design of our products will stand up to spills, drops, bumps and all of the other minor mishaps that can happen in everyday use.", said Stephan Herron, Director of Sales and Marketing of Scriptel Corporation. "We are happy to have been selected by iPatientCare as a best-of-breed signature capture device and look forward to helping iPatientCare's customers go 100% paperless."

"iPatientCare, is always striving to make the workflow of office managers easy and accurate. Our integration with Scriptel with its capacitive pen digitizing technology, is a durable and cost-effective way to electronically simulate pen on paper and in an eco-friendly way", said Shahab Shaikh, Enterprise Integration Specialist, iPatientCare, Inc.

About iPatientCare:
