

**UST Global and Plutora Partner to Deliver DevOps Solutions
for Global 1000 Companies**

Unified Release Management and Test Environment Management in the Cloud

MOUNTAIN VIEW, CA - January 07, 2014 – Plutora, Inc., the leading global provider of enterprise release management and test environment management SaaS solutions, designed to accelerate the end-to-end software delivery journey through transparency and control, today announced a global strategic partnership agreement with UST Global, a leading provider of end-to-end IT Services and Solutions for Global 1000 companies.

Under the partnership, UST Global will incorporate Plutora's SaaS Solution into their DevOps service line to provide end-to-end test environment management services. UST Global will train and certify personnel on the Plutora's SaaS solution.

"Organizations are aggressively looking to accelerate delivery, shorten release cycle and increase quality to realize customer value faster," said Michael Hopewell, Managing Director Europe at UST Global. "Companies need cutting-edge solutions that enable them to manage the test environment across the entire lifecycle ranging from initial booking, environment assignment, provisioning, environment change requests, contention resolution, reclaim and financial cross charge."

"Both Plutora and UST Global recognize that the ability effectively manage the test environment landscape is a critical success factor to accelerating software delivery within the enterprise," said Dalibor Siroky, Co-Founder and Director, Plutora. "Plutora has been growing exponentially based on the value Plutora provides to customers with respect to risk reduction and cost avoidance. This strategic partnership will expand Plutora's ability to engage customers as part of a comprehensive people, process and tools offering. It will also provide UST Global's customers better access to the Plutora's solution."

UST Global and Plutora together completed the implementation of the SaaS solution for a leading UK based Retail client. The implementation helped further drive the establishment of a centralised Test Environments Management function. The immediate benefits realised were in planning and allocating environments providing control by easily being able to manage environment contention across the Enterprise which resulted in cost savings.
