

CRS Advanced Technology Announces Launch of SubFinder® elite

Version 1 of Latest Upgrade is Released

Montoursville, PA • January 12, 2015

CRS Advanced Technology has announced the launch of their latest software upgrade, SubFinder *elite*. This latest release incorporates the last 27 years of SubFinder product development with a modern look, new features, and functionalities.

SubFinder *elite* Version 1 offers over 200 new features including a completely web based application for all users, user-specific dashboard, a totally redesigned report engine, and advanced scheduling capabilities to assist in the management of block and rolling schedules. The new upgrade also includes a message center for operators and administrators that allows messages to be sent out to the whole organization or to targeted user types, and more refined user permissions for administrators, employees, and substitutes.

"We couldn't be more excited for the launch of SubFinder *elite*. CRS has always been a leader in the market and *elite* will secure our position at the head of the pack," states Peter Lupacchino, Vice President and General Manager of CRS Advanced Technology. "There has been considerable time, effort and dedication from all parties involved on this product. I have the utmost confidence that our efforts will pay off and SubFinder *elite* will be well-received by both current and prospective customers."

On the marketing front, Maxx, CRS's signature mascot, is now joined by his *elite* Squad. This band of functionality-based superheroes includes Ruby Reports, ACA Alice, Quality Quinn and others.

"Over the years, the SubFinder software has evolved to so much more than just an absence management and substitute placement solution. SubFinder *elite* features countless functions that will benefit organizations from every aspect and we want to tout that," says Lupacchino.

About CRS Advanced Technology

CRS Advanced Technology is committed to providing superior market-centric, innovative, and efficient absence management and substitute placement products and solutions to meet the ever-changing needs of human resource professionals.

SubFinder, the company's flagship product, has been used by organizations throughout North America to automate the substitute placement process since 1987. For more information, please visit crsadvancedtechnology.com or call 800.782.3463.
