DoseTracer™ Inventory and Payment Tracking Software for Pharmaceuticals will begin delivering instant savings to your practice regardless of the implementation status of your EHR program, and can be readily adapted to any future configuration of your practice management / EHR solution.

> Providing invaluable inventory and payment status information to multi-office practices since 2010

Inventory and Payment Tracking Software for Pharmaceuticals

∎ose∎racer™

Inventory and Payment Tracking Software for Pharmaceuticals

Tracking and Reporting Each Dose from Incoming Delivery to Final Payment

Now with 2D Barcode Technology

DoseTracer[™] software has joined the Greenway Health online Marketplace of value-added partners for users of Greenway's integrated EHR/PM solution. Our software products have been used by multi-office medical practices since 2010. Now, we've added **2D barcode** processing capability to our **DoseTracer**TM Inventory and Payment Tracking Software for Pharmaceuticals so your practice will be prepared for the move to the new technology.

Here are a few of the many reasons our clients have chosen DoseTracer[™] software to meet the needs of their practices:

• No setup fees or installation costs – installed via the internet – and affordable monthly subscription rates – cancel at any time

• Your encrypted HIPAA data remains your property with no access to anyone outside of your computer network

• Utilize your current computer systems and printers

• Shipments with both linear and 2D barcodes will seamlessly process without the need for user adjustments or equipment changeovers

• Track an unlimited number of different drugs from receipt of shipment, through patient assignment, billing, and final payment

- Common databases are shared among multi-office practices, allowing easy interoffice status checks, transfer of doses, and report generation
- Complete assignment, reimbursement, and accounting process for all subsidized drug programs

Contact us to hear more reasons for using our DoseTracer™ software

Some of the many available on-demand reports:

- Daily Activity for user specified date range
- Invoice report detailing receipts for each dose
- •Display of all billing errors and omissions

•Cross check of billed vs. assigned doses to verify that all medication has been assigned
