

Connect with other hospital leaders at this patient throughput event. Patient Flow Connect features presentations by industry experts and local hospital leaders who will share insights on patient flow success. Registration for this event is free.

Where: Renaissance Orlando at SeaWorld  
6677 Sea Harbor Drive, Orlando, FL 32821

When: Thursday February 19, 9:00AM – 3:00PM (Lunch Provided)

Register: [patientflowconnect.com](http://patientflowconnect.com)

## Agenda Highlights

### **Baptist Health South Florida: Transformation from a Transfer Center to a Healthcare Communications Center**

Leslee Gross, Assistant VP Operations and Julieta Ducasa, Manager Transfer Center will share their story of how they transformed their transfer center to a full healthcare Communications Center.

### **Using Transfer Centers to Enhance System Integration**

Scott Jordan, VP Consulting & Education Services at Central Logic, will discuss the transfer center's unique position to enhance patient flow before, during and after the hospital stay. He will include use cases and discuss the value of effective reporting.

### **Understanding Patient Flow's Potential Impact on Population Health Management**

Dr. Darin Vercillo, Chief Medical Officer at Central Logic, will discuss how transfer center and patient flow directors are perfectly positioned to successfully tackle key areas of population health like readmission reduction, improving post acute care, and more.

### **Manipulating Constraints to Optimize Capacity and Improve Patient Throughput**

Mike Harrington, Patient Flow Consultant with Central Logic, will describe how to mitigate the impact of variation, constraints, and waste through processes and technology. Mike will discuss overcoming barriers that impede patient throughput.
