International Conference on

Sports Medicine and Fitness

Sports Medicine-2015

Chicago, USA March 23-25 2015

“To evaluate science involved in sports medicine, physical activities, and injuries”

Sports medicine, also known as sport and exercise medicine, is a branch of medicine that deals with physical fitness and the treatment and prevention of injuries related to sports and exercise. Although most sports teams have employed team physicians for many years, it is only since the late 20th century that sports medicine has emerged as a distinct field of health care. There are 9 sports medicine universities in the Chicago, 2 rehabilitation institution and research centers, 8 Sports medicine and Orthopedic hospitals. Around 45 sports medicine related Universities, schools, hospitals, rehabilitation centers, research centers in Illinois. In USA around 400 sports medicine centers, physical medicine centers, societies and associations.

International Conference on Flu

Chicago, USA June 08-10, 2015

“Understanding the Flu; Pathology, prevention, containment and risk analysis”

As the world shrinks the ease with which an infectious diseases spreads amongst the population increases exponentially. Influenza or flu as it is commonly known is one such disease. The flu virus is unstable and mutates often. This virus while mostly non-lethal can easily develop the ability to kill and infect millions of people, as seen with the Spanish Flu of 1918. The scientific community must therefore work together to make sure any new influenza strain is constantly monitored and with the help of surveillance programs prevent a lethal influenza epidemic.

Annual International conference on

Fostering Human Resilience

Human Resilience 2015

Las Vegas, USA June 15-17, 2015

“Fostering human resilience”

It has been estimated that up to 90% of the US population is exposed to at least 1 traumatic event during their lifetime. Although there is growing evidence that most people are resilient, meaning that they have the ability to adapt to or rebound from adversity, between 5% and 10% of individuals exposed to traumatic events meet criteria for posttraumatic stress disorder. The growing elderly population has brought attention to dementia and Alzheimer's conditions. The cognitive disorders and dementia sector is valued at \$5.5 billion in 2010 and is expected to reach \$11 billion by 2015, a 14.9% compound annual growth rate (CAGR).

“Novel approaches in biomechanics and innovative methods in implant designing”

The United States is the biggest market for the Biomechanics and Implant Designing related business options, among which Florida shares 3% of the total market opportunities available in the world. This area needs more experts because day by day the medical cases are increasing but the rate of growth of healthcare system is very slow. In the US only, there were 35,000 registered bone related implant surgeries in 2013 which is increasing at a rate of 4-5% yearly, and professionals for these type of surgeries is growing by 1-1.5% every year.

3rd International Conference and Exhibition on Traditional & Alternative Medicine

Traditional Medicine 2015

Birmingham, UK August 03-05, 2015

“Understanding the wisdom of nature cure, encouraging new innovations in treatment and rehabilitation”

The global alternative medicine sector is expected to reach close to \$115 billion by 2015, according to Global Industry Analysts. Market growth is fuelled by a trend toward herbal and nature-based products, based on the presumption these products cause fewer side effects than modern medicines. Alternative medicine disciplines such as acupuncture, homeopathy, massage, ayurveda, and traditional Chinese medicine are being practiced more widely in the western world. Around 75% of the population in emerging nations receive alternative medical healthcare, compared with over half of the population of developed nations, particularly for lifestyle-related diseases.

“New recommendations and practical approaches in the treatment of endocrinal disorders”

In United States alone, more than 50,000 people die every year. Nearly 20,000 people are treated annually for type-1 and type-2 diabetes every year. The global endocrinal healthcare market touches around \$2.03 billion. Endocrinal associations are being funded annually about \$212,286 million to \$407,716 million for endocrinal research. Reflecting this imperative, Omics International believes that professionally-oriented education in endocrinal research is essential in the training of clinicians and academicians and organizes Endocrinology-2015 conference in Atlanta, USA this year which will provide the future leadership in this key area for global health.

Supporting Association for Nephro-2015

Kidney Cancer Association

The Kidney Cancer Association (KCA) is a charitable organization made up of patients, family members, physicians, researchers, and other health professionals globally. It is the world's first international charity dedicated specifically to the eradication of death and suffering from renal cancers. It is also by far the largest organization of its kind, with members in more than 100 countries. We fund, promote, and collaborate with the National Cancer Institute (NCI), American Society for Clinical Oncology (ASCO), American Urological Association (AUA), and other institutions on research projects. We educate families and physicians, and serve as an advocate on behalf of patients at the state and federal levels in the United States and globally.
