***OnRamp Founder to Panel Discussion at ITEXPO Miami***

AUSTIN, TX – OnRamp, a leading high security and hybrid hosting provider with data center locations in Texas and North Carolina, announced today that company Founder, Chad Kissinger, will be participating in a panel discussion at IT Expo East on Friday, January 30, 12:00pm-12:45pm at the Miami Beach Convention Center in Miami Beach, Florida.

ITEXPO is the business technology event that brings together IT professionals and experts to explore the latest technology and trends related to cloud computing, mobility, IoT, BYOD, virtualization and more. The event will take place over the course of four-days, from January 27-30, 2015, and is hosted by TMC, a global, integrated media company with publications ranging topics of Cloud Computing, M2M Evolution and Internet Telephony.

The panel discussion, titled: "Hindsight is 20:20 – Making Sure Your Technology is Poised for Your Future," will be moderated by Eric Lebowitz – TMC. Kissinger will draw from his 20 years of experience in the IT industry, founding OnRamp as an Internet Service Provider and aiding in the company's evolution to a national data center with multiple facilities that deploy hybrid hosting solutions with a focus on compliance. Kissinger will look beyond the year 2020 to help answer questions like: "How big will BIG DATA become?" and "How to future proof your IT infrastructure?"

"With increasing cyber security threats and an evolving legal landscape guiding the confidentiality, availability and integrity of data of all types, we anticipate a number of changes will take place in 2015 and beyond which will impact IT greatly," stated Kissinger. "Among those, we predict the current trend of integrating self-hosted and cloud-delivered software and applications, creating a customized blend of IT services, will be the predominant means of addressing data privacy and security as well as business needs.
