"Love never fails"
1 Corinthians 13

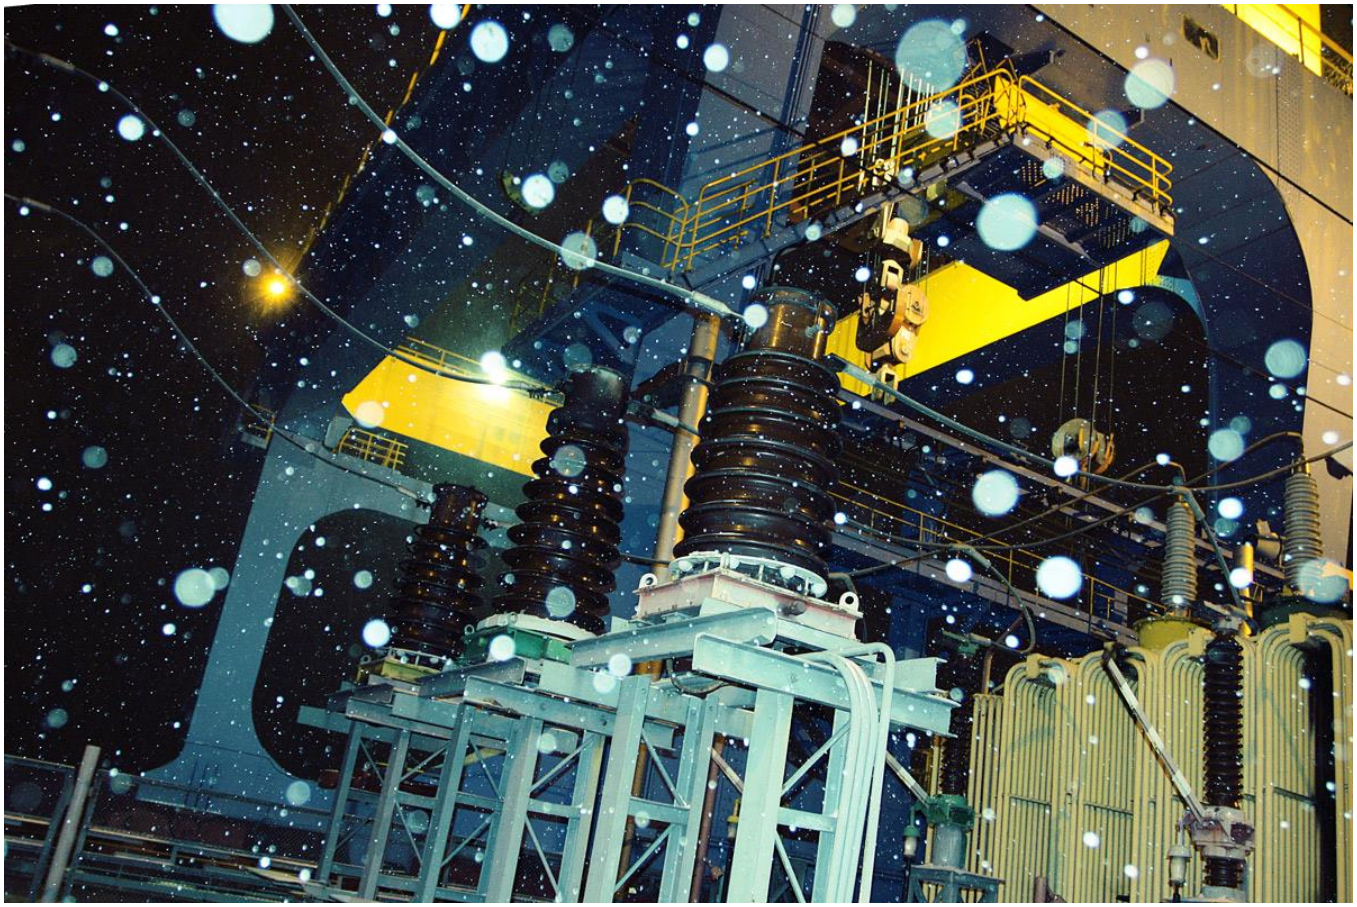
Nowell Development
Software, and Solutions Portfolio 2015-2016

Verity software

- *We need a way to keep track of all our equipment in various sites*
- *We need to manage flow in our distributed work sites, to enable efficiency*
- *We need to manage international logistics and distribution to be more agile*
- *We need to better manage our safety initiatives, to enhance collaboration*
- *We need to assure that demand meets supply, and we are not short!*

NOWELL

Engineering (safety): We need a way with software to guarantee zero down-time, zero non-productive time, zero points of failure, improving performance of our power infrastructure grid, by routine safety and maintenance inspections



NOWELL

Verity software

- *Cloud based industrials and logistics software*
- *Manage and define inventory, model movement, distribution all in real time*
- *Manage distributed, locations, warehouses and transport*
- *Software automates flow, and movement*
- *Industrials: safety design team collaboration*
- *Real time safety inspection runs for industrials assets of any kind*

Retail logistics focus: "We succeed when our customers come into our store, and gladly find what they need. Software that helps us assure that we have the right products in stock, is critical to our success"

NOWELL

Verity software

- *Integrity ,safety and security is important to our business*
- *We want our people and clients to work safely without injury or harm*
- *We want to reduce risks of safety incidents or industrial work accidents*
- *We need ways to automate safety inspection to prevent maintenance break down or surprise equipment failure*
- *We want our information and business to be secure and safe, supported by integrity, trust and collaboration*

NOWELL

NOWELL

Verity software, Shalom ESX 4.3 Integration

- *Consumer Retail: Our customers tell us that we run out of dairy supplies during the summer months and we need to better fix this*
- *We need to prepare for unexpected spikes and need to track what we have*
- *Integrity, Security, Trust: Shalom ESX Cloud Security Software integrates with Verity to provide cloud security, multifactor authentication, and integrated risk management coupled with reliable flex industrials software solution covering the use cases described*
- *A win-win value proposition*

NOWELL

"Some parts of my job involve huge personal risks. It makes me glad that we use the right software to assure that all our equipment and work tools, have been inspected, to assure that we return home safely each day"
