

Complete Cloud Web Security

CyBlock Cloud Web Security provides advanced Web filtering, threat protection, comprehensive reporting, simplified management, and more – all in a deployment requiring no hardware or software to buy and install, and no ongoing maintenance.

Advanced Web Filtering

- Configure policy exceptions for different users and groups.
- Filter by 70+ standard and unlimited custom categories.
- Implement flexible, scheduled filtering by day, hour, or half hour.
- Use white & black lists to restrict or allow access to certain sites.

Threat Protection

- Keep out malware, Trojan horses, spyware, phishing attacks, and more.
- Identify and stay ahead of a growing number of malware sites.
- Prevent crashes, slowdowns, and information theft.

Bandwidth Management

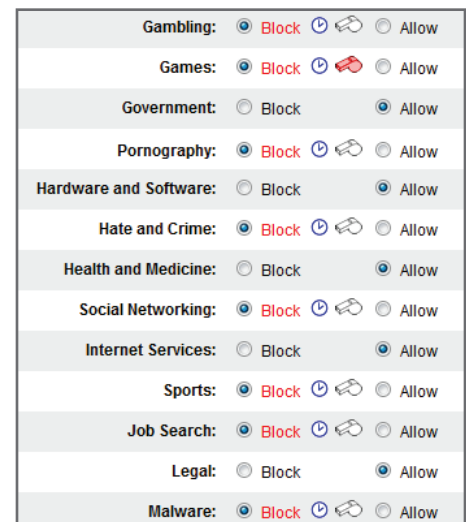

- Ensure speed and reliability of mission-critical Web activity.
- Cap bandwidth or block nonessential categories with policies.
- Configure total-usage thresholds to dynamically trigger caps.
- Get e-mail alerts and limit bandwidth usage when thresholds are exceeded.

SSL Traffic Inspection and Control

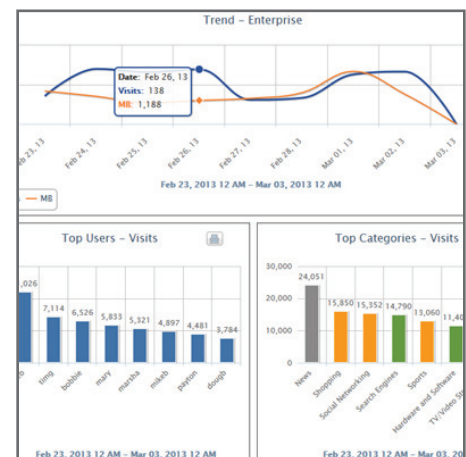

- Identify malware threats hidden in secure traffic.
- Inspect or “tunnel” HTTPS by Web site, category, or user ID.
- Enforce usage policy on both unsecured and secure traffic.
- Identify and block “hidden” anonymizer proxies that use HTTPS.

Comprehensive, Manager-Ready Reports

- Comply with government and industry regulations such as CIPA and HIPAA.
- Use CyBlock Dashboard for quick, high-level assessments.
- Get a variety of high-level summaries and detailed audits.
- View all user searches and unacceptable visits.
- Schedule reports for automatic distribution.

Technical Advantages

- **Continuous List Updates.** Automatic list updates with no user intervention.
- **Minimal-Effort Administration.** No hardware or operating system software to support and maintain.
- **Quick Deployment.** Easily support remote users and branch offices.
- **Reliable, Independent Operation.** Consistent speed and performance.
- **Scalability.** Handle small to large amounts of data as your company grows.
- **Browser Compatibility.** Fully tested in the latest version of Internet Explorer. Also compatible with Internet Explorer Version 8.0 or higher, Firefox, Chrome, Safari, and Opera.

CyBlock Cloud Setup

Security and Reliability

Our cloud data center is state-of-the-art SSAE 16 (SOC 1) TYPE II certified infrastructure and is monitored 24/7/365 by a network operations center. The cloud computing infrastructure is housed in a secure, fireproof, climate-controlled facility with multiple direct connections to the Internet backbone. Rest assured that your data will be safeguarded.

Evaluation Support

When needed, Wavecrest provides consultation and advice via telephone or e-mail at no charge during the free 14-day trial period.

Pricing

CyBlock is a licensed, subscription-based software service. Pricing is tiered, based on the number of personnel (“nonconcurrent users”) to be monitored. In general, the price-per-user decreases as the number of users goes up. Every CyBlock purchase includes:

- No-charge, U.S.-based technical support for the lifetime of your license
- Continuous URL List updates
- Free product upgrades

Discount pricing is available for government agencies, educational institutions, nonprofit organizations, and resellers. For more information, contact Sales at 321-953-5351, Ext. 3.

Wavecrest Computing has provided business and government clients with reliable, accurate Web-use management products since 1996. IT specialists, HR professionals, and business managers trust Wavecrest's Cyfin® and CyBlock® products to manage employee Internet usage – reducing liability risks, improving productivity, saving bandwidth, and controlling costs.

Wavecrest has over 3,000 clients worldwide, including Edward Jones, General Electric, IBM, MillerCoors, New York City Dept. of Transportation, Rolex, Siemens, and a growing list of global enterprises and government agencies. For more information on our company, products, and partners, visit www.wavecrest.net.
