The Baer Group, LLC Announces New SAP Security Consulting Practice and Practice Director

The Baer Group will deliver to the market expertise and services for the full line of SAP's security-based technologies including IAM, IDM, SSO and GRC

Atlanta, Georgia. February 16, 2015 – The Baer Group (TBG), an award-winning SAP staffing and consulting firm, is pleased to announce the formation of a newly-developed consulting practice to address the concerns regarding the security of SAP Enterprise Solutions. TBG will offer Staff Enablement and Staff Augmentation services for the full line of SAP's security-based technologies including Basis/Role-based security, IAM, IDM, SSO and GRC.

Increasingly, TBG's customer and partner concerns are focused on protecting their data and their customer's data, controlling system access and eliminating data breaches. Thus, TBG has decided to make a strategic investment to deliver these critical capabilities.

At the same time, TBG is pleased to announce that Mr. Marshall Goodson, formerly IAM Security Technical Advisor with SAP, has joined the TBG team as Practice Director, SAP Security, IAM and GRC. Marshall will assume leadership of TBG's SAP Security consulting teams and staffing services that will provide support to its strategic partners and clients. Goodson brings more than 25 years of experience consulting with large and complex organizations across various industries and sectors, including food and beverage, communications, government, manufacturing and energy.

“Marshall brings vital security assets to The Baer Group with his in-depth knowledge of Identity Management and the SAP suite of security offerings,” stated James Boler, Executive Vice President and Partner of The Baer Group. “We now have the experience and resources needed to launch our SAP Security consulting practice.”

About The Baer Group
