

# TrackSaver to keep your vids at hand - just in case.

What if you had to go to North Korea? Or suddenly a zombie apocalypse broke out? You'd die - of boredom without your favourite videos on YouTube. So why not download them in advance?

The flvto.com and CloudConverter team presents a solution - the TrackSaver app. It's a revolutionary online downloader that gets installed into absolutely any browser. It enables you to download videos from YouTube as well as other video hostings - in such popular formats as mp4, avi, mov and even converted to mp3.

Mind that even if your browser crashes, or you decide to switch to another one, TrackSaver stays with you. It smoothly runs in Chrome and other browsers.

Find a video, click the green Download button that appears under it and - bang! you got it on your desktop. It's easy to use and install, no tinkering with settings. Run the installation - and it's ready to go.

And some words about the team:

**Flvto.com** (<http://flvto.com>) - Saves your tracks for better times.

Converts online video and audio to any portable formats — for free. Our service helps to pump up your home media library with favorite songs and videos. It doesn't demand registration, keeps high quality, can convert any number of files.
