## MVP Systems Software Launches Global Field Services Group

**MVP Systems Software launches dedicated, on-site services for organizations employing and evaluating JAMS Job Scheduler for centralized workload automation.**

**20 January 2015** – MVP Systems Software, Inc., a leading provider of enterprise job scheduling and workload automation software, announced today the general availability of its field services. The group provides on-site training, conversions and dedicated assistance with enterprise-class automation initiatives.

“We designed our field services program to make the transition to enterprise workload automation efficient and constructive,” says Devon Lawler, Director of Technical Services. “On-site engagements have enabled us to tailor training and onboarding to the unique context of a customer’s business requirements and IT infrastructure.”

MVP’s Global Services Group provides:

- classroom training for new users
- advisory services for custom application integration
- conversion services from legacy schedulers
- assistance with installation, configuration and testing
- automation solution design

JAMS field engineers bring extensive expertise in server operating systems and business applications such as ERP, BI and database platforms. MVP also offers specialized assistance to organizations using JAMS to automate batch processes in public, private and hybrid cloud environments.

“On-site engagements give customers an added opportunity for IT teams to test a wider range of automation techniques than originally intended,” adds Lawler. JAMS field service engineers are equipped to demonstrate a wide array of batch processing examples and to do so in virtually any environment.

JAMS field services engagements are now widely available throughout North America, Europe and Australia.

### About JAMS

JAMS is the only job scheduling system built on a .NET framework and is the first enterprise job scheduling system that can be leveraged by both IT Operations Personnel and Application Developers. With its roots in Windows, JAMS also supports running processes across a variety of operating systems (UNIX, Linux, System i, OpenVMS, etc.) and applications (PeopleSoft, SAP, SQL, Oracle, Symitar, Ecometry, etc.). To learn more about JAMS, please visit [www.JAMSScheduler.com](http://www.JAMSScheduler.com) or call 800-261-JAMS.
