

## PRESS RELEASE

London, February 23, 2015

**Kenavo.co.uk: a new super-fast and innovative website to get in a second, all flight schedules for any destination worldwide.**

In less than 1 second, Kenavo displays all flights schedules to get from A to B, for the 10 upcoming months, with estimating the price of the flight ticket.

---

**The fastest website to get any flight schedules, to go from anywhere to anywhere :**

[kenavo.co.uk](http://kenavo.co.uk) displays in less than 1 second, monthly flight schedules between any destinations worldwide.

Because there is no need to enter specific departure / return date to get schedules, Kenavo is much faster than traditional travel search engines.

**Best flight or car route to get from A to B :**

Kenavo help travelers to get from A to B by calculating, all of the possible flight routes, between two places (cities, villages, islands, ...) . It displays the best options in terms of flight time, driving time to the airport and ticket cost.

The purpose is to find the best compromise between the cheapest flight and the shortest door-to-door journey time.

For any given flight itinerary, travelers know whether it is better to leave on a Saturday morning instead of a Friday evening, or perhaps to leave from a different airport nearby

A car itinerary can also be offered as an alternative to the plane where relevant.

Example: [going from Fowey to Addiewell](#)

"Sometimes, it's better to travel a bit further to get to an airport where the competition between different airlines, and/or the presence of budget airlines lowers the price of flights to certain destinations," remarks Guillaume Paillet, founder of Kenavo.co.uk.

## **Estimated price for any flight ticket, in a second :**

Kenavo relies on a statistics database of over 650 million airplane tickets sold in the last three years, to provide in less than 1 second, a reliable estimate of the price of flight tickets for any destination.

## **Why is Kenavo.co.uk really different ?**

### **Kenavo is ultra simple :**

All users have to do is enter the start and end points of their journey: these could be cities, villages, islands, countries, mountains, or wherever they want to go (over 2.5 million places covered around the world); and then choose the month of departure.

### **Kenavo is super-fast :**

In less than 1 second, Kenavo displays all flight options with schedules and estimated cost for any destination.

### **Kenavo is time-saving :**

No need to try airports and travel dates combinations, Kenavo does that for you in a second.

## **About Kenavo.co.uk:**

Kenavo was founded by Guillaume Paillet (CEO) and Jean-Christophe Janicot (CTO). Both are in the Internet industry since 1998. They founded Alibabuy, a major travel search engine in Europe, Touslesprix.com, (one of the main shopping search engine in France) and Eanfind.co.uk (Shopping search engine accross Europe).

Kenavo has been expanding rapidly and is already established in 15 countries (US, Mexico, Columbia, Chile, Brazil, South Africa, France, UK, Spain, Portugal, Russia, Taiwan, China, New Zealand and Japan)
