"Our Forex Gemini Code review shows that it is a digital product. You will get an actual package on your doorstep, and it will include everything you need to make the program work for you. First, you will get 6 DVD's that cover everything you need to know," reports Stevenson. "You will get access to videos, weekly webinars, new software, upgrades, reports and even a forum. Since he is only including a small amount of people, you have access to a forum where ideas can be discussed, problems can be resolved and aha moments can be had. If you have ever been part of a mastermind group, then you know how valuable this forum will be."

Forex Gemini Code includes trading concepts, trading tools, component rules, example trades, live trades and webinars that includes common questions one will likely have at some point or another. Besides the DVDs, users also get a trading manual, which is fully illustrated, to help them understand every aspect of trading the system. They also get 5 cheat sheets that help them instantly know whether or not a setup is a trade they should take or not.

"Created by Vladimir Ribakov, who has spent 11 years successfully trading and who knows the secrets you need to know, the system does 90% of the work for you. It works for beginners or experts and can adapt to any trader's style," says Stevenson. "Learn the strategy that has been shown to make money consistently and put it to immediate use. It works on all pairs and in all time frames. You get help through members-only area, 24/7 customer service and support through phone, email and Skype."

"Forex Gemini Code goes above and beyond. You get this trading system as a physical product shipped to your door and everything you need to start trading successfully. Plus, you get access to weekly webinars and a forum to help you find answers, a year's worth of daily and weekly forecasts grow your trading knowledge and become even more successful.
