## Kitting

NJMET kitting and assembly services provide the best expertise available in assembling, packaging and shipping products according to any customer's specifications.

NJMET, with experience in all aspects of kitting and order processing, follows the specifications and alterations of every order so that only perfectly prepared and packaged shipments go out to your customers.

### THE BENEFITS TO YOU?

- Reduced inventory – we'll store component products and finalize product kits just before delivery
- Customized fulfillment – drive customer or consumer satisfaction with the right products, delivered exactly as ordered
- Quick response – no matter how sudden, customized or extensive the order, NJMET gives you an economical, at-the-ready resource that handles it with turnkey efficiency

**Why Kitting?**

- ✓ Reduced Costs
- ✓ Reduced Stocks
- ✓ Reduced Vendors

NJMET has the experience and knowledge required to make sure each order contains all the items (and only those items) on the order slip. Getting to that point in kitting involves various steps of pulling from stock, assembling components and properly packaging everything.

# PROCESSES BEHIND NJMET KITTING FULFILLMENT

NJMET Fulfillment has the technology and skilled workforce to supply outstanding performance. In order to successfully kit and ship customized products to consumers, NJMET Fulfillment puts multiple advantages into play on behalf of your next kitting job.

## OTHER NJMET KITTING ASSETS?

NJMET Fulfillment kitting solutions makes business easier for merchants by:

- Create and enter part numbers into MRP System
- Create a BOM and provide ongoing Issue/Revision Control
- Providing secure, clean and safe warehouse storage space so that you don't need to spend money on building and maintaining your own warehouse
- Supplying all types of shipping materials
- Having the flexibility and agility to quickly address product surges and rush jobs

## ONCE THE CUSTOMER HAS PROVIDED THEIR BILL OF MATERIALS THE KITTING PROCESS BEGINS:

- **Assignment of a Project Manager.** One of our Account Managers will oversee your project from start to finish, allowing you to have a single point of contact every step of the way.
- **Sourcing of all material from the most cost-effective locations.** NJMET utilizes contracted preferred-pricing relationships with the world's largest component suppliers to provide material at the best possible value.
- **Suggestion of cost-effective alternate products.** If requested, we will provide alternate product suggestions and samples.
- **Procurement of all material.** NJMET will coordinate all ordering and inbound shipping of your required material.
- **Product Validation and Verification.** Our experienced staff verifies all material for form and fit. Any products requiring further testing or validation is tested in house so as to provide uncompromised Quality Assurance.
- **Packaging all material for build.** NJMET handles all necessary packaging requirements for the kit including Tape-and-Reeling. Overages are included for all items to make sure that you have enough material to complete your build.
- **Labeling and Classification.** Our Logistics Team will provide custom labeling (including customer part numbers, references, board location, etc.) for each line item of the kit.
- **One delivery, One invoice.** The customer is provided the completed kit with one invoice.
