

Dynamic Situational Awareness for Better Response

## TrooTrax™ Flexible Mapping Solutions

### TrooTrax – Many Devices, Many Options – One Operational View

TrooTrax operates in the cloud bringing you live situational data, device stats, landmarks, timed milestones and other data sources direct to your computer, tablet or smartphone.

### Automated Reporting and Dashboards

Improve Safety using reports for aircraft maintenance, trip details, on-tarmac metrics, squat switch and other I/O event reports.

### Your Choice of Best-of-Breed Hardware & Airtime

Troo engineers will work with you to select the best satellite or other wireless tracking hardware for the job, and even supply global airtime or managed data services to suit your requirements.

### Systems Integration & Custom Solutions

If our suite of mobile and web-based mapping and data management applications need extending or integration with your existing enterprise systems – no problem – our team will work with you to determine what can be done. (call 1-877-702-TROO for Aero Solutions).
