Jamieson Wardall joins Aerovox Corp as Director of Engineering

New Bedford, MA (March 4, 2015) - Aerovox Corp. has announced that Jamieson Wardall has recently joined the company as Director of Engineering. Jamieson has over 15 years' experience in new product design and development, operations and manufacturing in the semiconductor industry.

Before joining Aerovox, he was an Applications Manager at Texas Instruments where he provided leadership and direction to project teams by understanding customer requirements. Prior to that, he held engineering and management positions at ON Semiconductor, MAXIM, National Semiconductor and Folsom Research. He started his career with the U.S. Air Force. He also is a US patent holder and has published many technical documents in a variety of IC devices.

"We are pleased to welcome Jamieson to the Aerovox team," said Jim Faughnan, Aerovox President & CEO. "His technical knowledge, leadership skills and customer-focus add energy and strength to our engineering department. I expect that Jamieson will have a significant impact as we develop our product lines to meet evolving market needs."

Jamieson earned his Bachelor of Science degree in Electronic/Electrical Engineering from California State University and his Master of Science in Electrical Engineering from Arizona State University. He received training in military electronics from the U.S. Air Force and holds a certification in project management.

About Aerovox Corp.

Aerovox is a leading provider of film capacitors for industrial, medical, military/aerospace and specialized applications serving original equipment manufacturers (OEM) and distributors. The company has world-class design, manufacturing and testing facilities in New Bedford, Massachusetts and global manufacturing facilities in China and India to enable quick turn-around for shipping and delivery worldwide. Aerovox capacitors are among the world's most reliable electronic components. The company's extensive custom design and development capabilities coupled with its broad, standardized product offerings allow it to provide intelligent capacitor solutions that meet or exceed customers' application requirements. <http://www.aerovox.com>
