

**Flexibility, Speed
and Security**

All part of the Decision First Technologies' BI in the Cloud program

Take advantage of this pay-as-you-go flexible licensing model today

Your day-to-day business needs flexibility. In fact, it requires it to remain competitive. But how do you keep infrastructure, licensing and maintenance costs under control?

DFT and Amazon Web Services (AWS) have teamed up to provide you with SAP BusinessObjects (BO) in the cloud. This program provides companies with immediate access to SAP's BusinessObjects BI Suite, including operational reporting, ad hoc query and analysis, dashboards and visualizations, data exploration and more without the procurement of traditional hardware and software products.

Plus, you'll have the confidence of knowing your cloud environment is delivered through the ultra-secure setting of Amazon Web Services, a globally recognized and comprehensive cloud services platform.

The DFT BI in the Cloud program is broken into two categories: customers who need SAP BusinessObjects Licenses and those who already own them.

Need SAP BusinessObjects licenses?

For customers seeking to purchase SAP BO licenses, DFT's subscription-based, pre-configured licensing options start at 5 users and go up to 75 users. These licenses come in both named and concurrent user packages which can, in some cases, be combined. For companies needing more than 75 user licenses DFT can customize a plan specifically for you.

Have SAP BusinessObjects licenses?

For customer seeking to utilize already procured SAP BO licenses, our BI in the Cloud program gives you the option of bringing your own BI Suite, complete with licensing rights, to the Amazon cloud. All it takes is entering your license key to gain access to the pre-configured, single box AWS cloud environment. Instantly you have access to your SAP BO tools and, if you need help migrating or setting up your existing environment, DFT helps you with that process as well. We work to ensure the success of your cloud environment!

- ✓ **Need an SAP BusinessObjects cloud environment by the end of the day**
- ✓ **Looking for a pay-as-you-go pricing model**
- ✓ **Need a low risk cloud solution you can cancel at any time**
- ✓ **Want access to data that can be delivered anywhere, anytime, on any device**
- ✓ **Looking to reduce IT involvement and costs**

We have you covered!

Any way you look at it, DFT's BI in the Cloud program gives you choices.

So if you're looking for ways to innovate faster, cut costs and take advantage of the speed and agility of a cloud environment then DFT's BI in the Cloud program is for you.
