

Jamaica Bearings Group

The Jamaica Bearings Group, serving the world since 1925

History

Jamaica Bearings Company, under the same family ownership since 1934, serves as the foundation for the Jamaica Bearings Group (JBG).

Originally a one person operation owned and managed by Frank Negri, it was Frank's ambition to become an industry leader by providing world class service to niche industries.

As we grew and developed our specialization in the Aerospace, Rail, and Industrial markets, sales offices were added throughout the United States, Europe, and Asia. The company continued to experience growth as we acquired Bobker Bearings Aerospace Division. In 1998, Jamaica Miniature Bearings was founded and shortly thereafter OEM West was acquired. These companies combined and now form our Precision Products Division (PPD).

FRANK NEGRI C.1935 ON SITE AT OUR FIRST LOCATION IN JAMAICA, NY

Cambridge Manufacturing, founded in 1999, quickly became a leading value added engineering resource for our customers. In 2004, we acquired Eriks Aerospace (now Jamaica Aerospace), adding seals and other synergistic product lines, and a robust and distinctive kitting program to our offering.

In 2006, the Jamaica Bearings Group was established: Jamaica Bearings Co., Precision Products Division, Jamaica Aerospace Co., and Cambridge Manufacturing. Each member company maintains specific areas of expertise but all have synergistic product offerings. As part of the Jamaica Bearings Group, they can draw on our resources as a whole.

TODAY, JAMAICA BEARINGS IS LOCATED ON EVERY CONTINENT

Products & Services

The Jamaica Bearings Group is an authorized distributor for over 200 of the world's leading manufacturers and is focused on streamlining and adding value to the worldwide supply chain for:

- Bearings
- Seals
- Rings
- Power Transmission Products
- Specialty Fasteners

In addition, we offer specialized *Value Added Services* including:

- Bearing Cleaning & Re-lubrication Services
- Production and MRO Kitting
- In-house Engineering Laboratory
- On Site Engineering Staff
- Supply Chain Management

JBG's focus and expertise in handling these products and services ensures that our customers enjoy the benefits of our 80+ years of product and supply chain knowledge. The feature of JBG's success in the industries it serves is attributed to the dedication of our employees and how our products and services are customized to each customer's requirements.

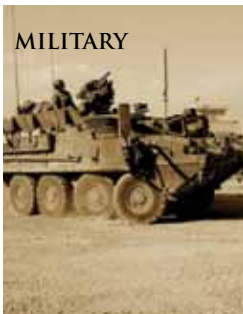

AEROSPACE

- Supporting the world's leading airlines, independent MRO organizations, system integrators, and OEMs
- Sales offices throughout North America and the world

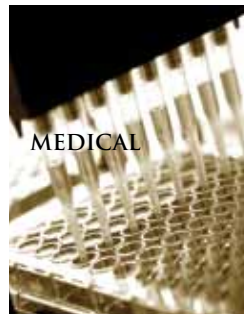

RAIL & TRANSIT

- Largest aftermarket distributor of bearings to the Class I rail, passenger rail, and transit authorities across the United States

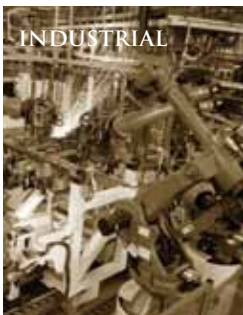

MILITARY

- Service Disabled Veteran Owned Small Business
- Leading supplier to the US government for over 30 years
- Extensive knowledge and experience in supporting multi-year IDPO contracts, Direct Value Delivery (DVD) and performance-based logistics (PBL) contracts

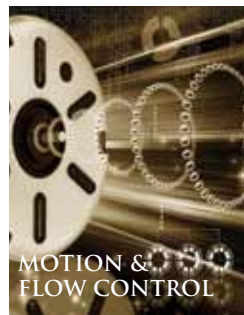

MEDICAL

- Supporting manufacturers of critical equipment including medical robotics, dental and surgical hand pieces, diagnostic, respiratory and CPAP equipment, infusion pumps, and mobility equipment

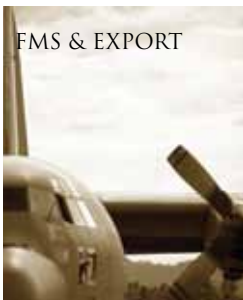

INDUSTRIAL

- Over 85 years of experience in supporting the market's power transmission and bearing product needs
- Food processing, municipal infrastructure, pharmaceuticals, petroleum and petrochemical, power generation, HVAC, and paper and cardboard converting

MOTION & FLOW CONTROL

- Industry-leading experience in supporting the miniature precision bearing requirements of North America's major manufacturers of sub-fractional and fractional DC motors, gearboxes, encoders, servomotors, syncros, and metering equipment

FMS & EXPORT

- Highly trained and experienced in export compliance rules and regulations (including International Traffic in Arms regulations)

SEMICONDUCTOR CAPITAL EQUIPMENT

- Supporting the leading manufacturers of semiconductor wafers with their critical application bearing requirement
- These applications include wafer etching, handling, washing, and polishing equipment

Distribution & Supply Chain Solutions

Filling a critical vendor consolidation and logistics role. Adding value in the Production and Aftermarket Supply Chain of highly engineered critical components to Original Equipment Manufacturers and System Integrators.

SUPPLY CHAIN SOLUTIONS

Through our Entire Procurement Inventory Control (EPIC) programs, value-added kitting, and predictive maintenance services, we work with our customers to create customized VMI material supply-chain solutions designed to reduce your entire cost of ownership, provide improved quality, and offer just-in-time delivery.

This is driven by streamlined thinking and best-in-class operations. We have over 50 years of experience managing complex supply chains in demanding industries throughout the world. With this history and our complex forecasting and inventory management tools, we design programs that deliver improved cash to cash cycles and bottom line results.

Certifications

Since 1925, the Jamaica Bearings Group has been in the forefront of the industry, keeping these cardinal values at the center of our operations. Our member companies, physically located on every continent, have created specialized niches directly crafted to become a *glocalized* organization. We strive to maintain a culture of efficiency, reliability, and expertise that ensures the best products and service for our customers, as well as our continued business success.

We ensure that each and every individual within the company is committed to our company mission: Quality - every day in every way.
