

SHAREPOINT COLLECTOR

Search and Collect Discoverable
SharePoint Documents and Lists

Are you looking for a robust application that can help you deal efficiently with Microsoft SharePoint documents and related items? Have you found your choices limited and expensive? Pinpoint Labs has released the **SharePoint Collector (SPC)** that is affordable, easy to use, and provides a defensible means of collecting discoverable information from SharePoint enterprise and cloud sites.

TARGETED SHAREPOINT COLLECTIONS

Want to quickly locate all SharePoint list items created or edited by a user? **SPC** allows you to quickly export document libraries, as well as perform targeted collections when needed, dramatically reducing the collection size and overall project costs.

Common electronically stored information (ESI) relevant to a litigation is often stored in SharePoint sites, but companies struggle in meeting their production requests. They find the built-in search and retrieval features don't provide a means to satisfy their requirements and don't know where to turn.

EASY DATA EXPORT WITH METADATA

Once a user selects relevant items, **SPC** exports those items to the location of choice. Files can be stored on a portable drive or saved to server locations (SANS/NAS). The resulting files include the associated metadata and detailed chain of custody that lists the date/time, hash value and other details that ensure a fully defensible ESI collection.

NO LOCAL INSTALLATION REQUIRED

Like other Pinpoint Labs products, **SPC** can be run from a flash drive or external hard drive without any local installation. In fact, remote collections have been completed where users only need access to the SharePoint website link and can collect data from a secure location. This significantly reduces hurdles often encountered by the IT staff in trying to service many requests.

Pinpoint Labs ESI collection products are relied on every day by many Fortune 500 companies, government agencies, and legal departments worldwide. You can request a free copy of Pinpoint Labs' **SPC** tool and find out how much easier it is to satisfy production requests and save money, too.

SHAREPOINT COLLECTOR (SPC) FEATURES

- ▶ Retrieve Contents From All Sites (*intranet portals, extranet sites, Internet and cloud locations*)
- ▶ Collect Everything (*documents, lists, calendar, contacts, announcements, attachments, Wiki, blogs*)
- ▶ Extract File Metadata (*embedded information that traces history, access or usage*)
- ▶ Maintain Chain of Custody (*evidence not altered or changed from the time it was collected*)
- ▶ Collect Relevant User Data (*ID, name, email address, personal profile, etc.*)
- ▶ Do Differential Collection (*searching only for files that have changes or have been added*)
- ▶ Retain Folder/File Structure and Display File Lists
- ▶ Run from Flash/USB Drive and Resume Incomplete Jobs
