

Enhanced Imagery from SoftOrbits with the Photo Retoucher Application

Enabled for 2 in 1 Devices Powered by Intel® Core™ M Processors

Even with the remarkable innovation of digital photography, pictures don't always come out perfectly. Thankfully, refining photos is a snap because the latest technology puts professional-grade capabilities in users' hands. The Photo Retoucher application brings powerful and intuitive tools to users worldwide with recent enablement for 2 in 1 devices powered by Intel® Core™ M processors.

Now, everything from color shift to object removal is as simple as a tap and a swipe. Importing damaged pictures for restoration is just as easy as capturing. The Photo Retoucher offers advanced image analysis that gives users a range of expert-level editing options like image sharpen, noise reduction, spot remover, scratch remover, brightness and a free-form selection feature that extracts unwanted objects from backgrounds without a trace. Once photographers achieve the look they want, they can share their images instantly on Facebook*, Twitter* or Youtube*.

Inspired, Bold Photos on Powerful, 2 in 1 Devices Powered by Intel® Core™ M Processors

Making corrections with the sophisticated features of the Photo Retoucher app is elegantly satisfying on this platform. Lightweight portability and high-performance touch screens help users define the final product. By eliminating the extra step of downloading images to a desktop, users experience the immediacy and accuracy of professional photographic enhancement with all the convenience of their mobile devices.

Features of Photo Retoucher on 2 in 1 Devices Powered by Intel® Core™ M Processors

- Object Extraction Technology
- Brightness Adjustment
- Spot and Scratch Removal
