

YOUR **VOTE** MATTERS!

YOU CAN HELP SAVE RED PANDAS

WINNING THIS VOTE WILL HAVE A HUGE IMPACT ON RED PANDAS
Here's what we plan to do with the \$30k funding:

Conserve 3770 hectares of red panda habitat and work towards improving the red panda status.

(that's close to 10,000 acres of land!)

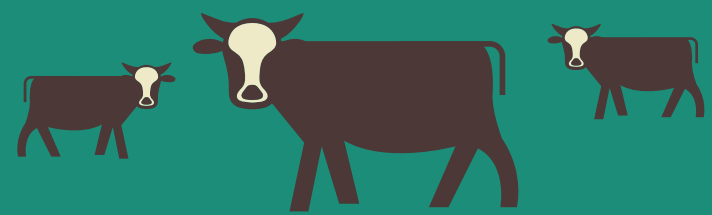

Assess the quality of the red panda habitat in the Ilam district (Nepal) and **develop a conservation management plan** for the area.

Train and support two new **Community Forest User Groups (CFUGs)**. These are groups of locals in Nepal that will aid in fire management in red panda habitat.

We will also add **Red panda monitoring** initiated in 4 CFUGs.

We will promote **organic farming in 150 HHs** (hectares).

Stall feeding practices promoted in **100 households** and artificial insemination for **100 cows**.

We will provide **tourism training for 10 nature guides and 15-20 families**. And together we will form Eco-tourism management guidelines.

3500 individuals in the local community will be trained on the benefits of conserving the eastern Himalayan Broad Leaf Forest with its indicator species, the red panda.

YOUR **VOTE** MATTERS!

PLEASE HELP US WIN \$30K FOR RED PANDAS

Vote for "Conserving Red Pandas, Nepal" and spread the word!
