

ROCKLER'S NEW BANDY CLAMP REVOLUTIONIZES EDGE CLAMPING

Applies Even, Non-Marring Pressure Around Edge Profiles

MEDINA, MN (March 26, 2015) - Rockler Woodworking and Hardware has introduced the Bandy Clamp Edge Clamp, an innovative tool that quickly and easily clamps edging to plywood, MDF and other sheet materials without damaging the piece or the edge profile. Bandy Clamp applies even pressure all the way around virtually any edge, including very ornate or decorative designs as well as oddly shaped or asymmetrical profiles.

Bandy Clamp makes edge banding and molding projects easy by providing fast, one-handed clamping. The clamping pressure is created simply by squeezing the clamp open and pushing the built-in flexible rubber band against the profile or piece being clamped until the desired resistance is achieved.

"The Bandy Clamp has changed the game of clamping tricky edge profiles and odd objects," says Steve Krohmer, Vice President of Product Marketing at Rockler. "Simply squeeze and push the clamp onto any piece that fits inside the jaws, and Bandy Clamp will hold it."

Each Bandy Clamp features a built-in flexible rubber band that stretches to conform to the shape of the item being clamped. The band is made of tough, tear-resistant rubber which has three extra-strength splines molded into it. Large, anti-slip clamp pads on pivoting jaws accommodate clamping at different angles with full pad contact. Neither the clamp pads nor the rubber band will mar the workpiece, allowing users to clamp a variety of contours and surfaces without worry.

Bandy Clamps (54258) are priced at \$19.99 per pair (or \$49.98 for three pairs) and can be purchased at Rockler Woodworking and Hardware stores nationwide, Rockler.com, or from the Rockler catalog. For store locations or a free catalog, visit www.rockler.com or call 1-877-ROCKLER.
