

eSight eyewear

An Industry First

- eSight is customized with your own prescription lenses and is fit to maximize comfort
- eSight gives you mobility and freedom - use it when and where you want
- Unique tilt feature lets you alternate between your prescription lenses and the eyewear, allowing you to perform routine activities from walking to reading without having to remove eSight
- Auto adapts for all distances – near, intermediate, far

Maximize Your Vision

- Magnification ranges from 1.5x to 14x
- Auto-focus enables you to quickly change your view
- Separate contrast and brightness features accommodate a range of different lighting
- Freeze capability allows you to take a still shot of an image
- Six custom color modes help to make reading easier
- Software is easily updated via a computer which enables the eyewear to remain current
