

# New Mobile Point-of-Sale

For tablets and smartphones

**Handpoint**

## 'Next-Gen' POS for Tablets & Handhelds

With EMV compliant chip and PIN payment processing

*Cost-efficient, turnkey handheld and tablet POS solution with integrated chip and PIN payment processing, and point-to-point encryption takes pressure off merchants rushing to meet the October 2015 EMV deadline.*

### Configurable for Any Sales Scenario

eMobilePOS is easily configured for any sales environment, enabling retailers, restaurants, mobile merchants, and other field users to generate orders, securely process payments, and manage inventory. In addition, it has a fully integrated gift card and loyalty program.

### EMV Compliant Payments

eMobilePOS offers EMV compliant payment processing in accordance with October 2015 deadline. eMobilePOS has certified three Handpoint chip and PIN readers for seamless and fully integrated EMV payments. In addition, eMobilePOS offers the ability to process checks (ACH and Check21), gift cards, cash, and NFC-based payments. Since eMobilePOS is a native application, it can process both online and offline sales.

### Interoperability

eMobilePOS can be operated standalone but also offers seamless integration with leading accounting, ERP, and legacy POS systems, including QuickBooks, Sage, RetailPro, SAP, Oracle, Demandware, Nexternal, and Microsoft Dynamics RMS.

### Freedom of Choice

eMobilePOS provides the freedom to customize the solution to meet the merchant's requirements instead of "squaring" them into a solution. A large selection of supported payment processors, allows merchants to pick the most cost-effective plan for their needs.

### Certified Hardware

eMobilePOS has certified a broad range of peripherals, including stands, cash drawers, chip and PIN readers, MSR, and printers to ensure high reliability and quick installation.

### Single Point of Control

eMobilePOS offers powerful, real-time reporting with web-based dashboards analytics, accessible from any type of device, allowing businesses to track sales, inventory, taxes, and discounts with multi-location/device/user support.

### Low Monthly Fee

eMobilePOS is a cloud-driven application and sold software as a service – with no upfront software license or server investments.

### eMobilePOS Key Features

- Process payments from any location
- Email or print receipts on the spot
- Integrate with accounting, legacy POS, and ERP

### Retail / Mobile Merchants

- Process sales transactions and returns
- Check inventory and price
- Full access to gift and loyalty programs

### Restaurants

- Take tableside orders and payments
- Wirelessly send orders to kitchen or bar
- Select add-ons and put orders on hold

### Field Sales & Service / Wholesale & Distribution / Direct Store Delivery

- Track deliveries real-time
- Collect proof-of-delivery
- Accept credit cards and checks

### Handpoint EMV Compliant Chip & PIN Readers

- EMV L1+2 certified chip and PIN reader
- Pair with a tablet or handheld device
- NFC & MSR capability for smooth transition
- Point-to-point encryption (P2PE)
- Remote key injection
