

ROCKLER ADDS NEW SAWSTOP JOBSITE TABLESAW

Portable and Compact with SawStop Safety Technology

MEDINA, MN (April 7, 2015) - Rockler Woodworking and Hardware has added the SawStop Jobsite Tablesaw to its product selection. It is the first fully portable compact table saw to feature SawStop's innovative safety brake, a feature that immediately stops the saw blade if it makes contact with skin. Its pedal-controlled stand functions as a dolly with 8-inch wheels when in the folded position, which allows users to easily move the saw around home, garage and jobsite areas, even up and down stairs.

The compact footprint of the SawStop Jobsite Tablesaw is convenient for those with limited space, especially hobbyists and do-it-yourselfers who work in a garage space shared with cars, bikes and other tools and machinery. The folding stand and rolling wheels are also very handy for contractors and others who need to transport the saw from site to site.

"The SawStop Jobsite Tablesaw is a unique combination of large saw capability and compact saw mobility," says Steve Krohmer, Rockler's vice president of product marketing and strategy. "It's perfect for people who don't have abundant space to permanently dedicate to a large table saw, and the unique safety brake feature provides peace of mind every time the saw is powered up."

Though compact and mobile, the SawStop Jobsite Tablesaw is a full-featured 10" table saw. The table extension rides on rails that slide out for a maximum rip cut of 25-1/2" right of the blade, while the sliding T-square fence ensures precise cuts and parallelism with the blade. One-turn blade elevation adjusts the blade to the desired height where competing saws require up to 25 turns to achieve the same adjustment.

The SawStop Jobsite Tablesaw (56191) is priced at \$1,299 and can be ordered at rockler.com or Rockler Woodworking and Hardware stores nationwide. For store locations or a free catalog, visit www.rockler.com or call 1-877-ROCKLER.
