

# **DIVERSIFIED FALL PROTECTION**

Diversified Fall Protection is an international engineering firm specializing in the design, development, and manufacture of highly engineered fall protection systems; a fall protection system is an engineered solution that keeps workers safe while working at heights. Since 1994, Diversified Fall Protection (DFP) has upheld its Life Matters™ promise by preventing the most common cause of work-related injuries by installing thousands of OSHA-compliant fall protection systems. From our headquarters in Cleveland Ohio with offices in Houston Texas, Lakeland Florida, and Charlotte North Carolina, Diversified Fall Protection provides the expert knowledge and reliable resources to keep employees safe and organizations operating within federal regulation. For this and other information, discover more at [www.FallProtect.com](http://www.FallProtect.com) and purchase our guardrail online at [www.PortableGuardrail.com](http://www.PortableGuardrail.com).

## *Office of Engineering*

### **Rocco G. Iascone, P.E. Manager of Engineering**

Masters of Science in Civil Engineering, University of Akron  
Bachelor of Science in Civil Engineering, University of Akron

## **Profile**

A senior level Professional Engineer with over thirteen (13) years experience in a multitude of commercial and private industries, Rocco manages the engineering department at Diversified Fall Protection. Iascone's expertise and competency in implementing turnkey design-build projects from preliminary pre-engineering at the proposal phase through final design, have catapulted Diversified Fall Protection's design engineering capabilities.

American Society of Civil Engineers (ASCE) Member · American Institute of Steel Construction (AISC) Member

## **Contributions**

- ◆ Structural Evaluation of Existing Buildings
- ◆ Equipment and Foundation Design
- ◆ Evolution of Material Handling Equipment
- ◆ Load Ratings and Lifting Devices
- ◆ Rigging and Heavy Lifting
- ◆ Structural Steel Design and Erection

## **Expertise**

**Buildings**  
Steel Fabricating  
Commercial · Manufacturing · Mills · Mines  
Material Handling  
Heavy Rigging and Moving
