Denovo Ventures, LLC Launches "IoT for Oracle's JD Edwards EnterpriseOne"

Las Vegas, NV – Collaborate 15 – April 13, 2015 – Denovo Ventures, LLC (dba Denovo), a Platinum level member of Oracle Partner Network (OPN), will showcase its new Internet of Things (IoT) and Wearable Solutions for Oracle's JD Edwards EnterpriseOne at COLLABORATE 15: Technology and Applications Forum for the Oracle Community, Booth #220. COLLABORATE 15 takes place April 12-16, 2015, at Mandalay Bay Resort and Casino in Las Vegas, Nevada.

Denovo's new IoT and Wearable Solutions are cost-effective offerings that can offer customers greater agility to dynamically grow and transform their businesses. These latest solutions demonstrate the company's continued success with JD Edwards EnterpriseOne. Denovo was among the first to offer JD Edwards in its private cloud and on Amazon's AWS public cloud. Denovo Labs has now collaborated with JD Edwards Labs on innovative IoT and Wearable Solutions to JD Edwards customers.

Denovo's IoT solutions include partnerships with device manufacturers and software vendors that enable access to emerging capabilities. IoT solutions include asset tracking, maintenance program improvement, operational performance monitoring, retail management and other solutions that apply across industries such as agribusiness, manufacturing, distribution, real estate management and more. Denovo is helping pave the way for companies to identify IoT use cases, design, implement and manage solutions including sensor networks, data gateways, real time event processing engines and Enterprise Resource Planning (ERP).

Denovo will be at COLLABORATE 15 to demonstrate the applicability of IoT and wearables in the context of JD Edwards and Oracle ERP. This is an opportunity for business leaders to learn about the components and use cases of IoT and what rewards can be had through reduced cost and increased efficiency. Combining business processes with advanced data collection and analysis tools provided in IoT solutions is a key tactic to gaining the most value from ERP investments.

"We will continue to provide customers with a broad choice in service and solution offerings that help build their organizations for long term performance while aiming to increase the benefits they receive from their Oracle's JD Edwards investment," said, Mark Goedde President of Denovo. "Our IoT and Wearable Solutions provides yet another choice for our customers that will help them maintain their competitive edge and improve their bottom line."

"Denovo will continue to be a market leader providing enterprise class on-premise and cloud services to our Oracle's JD Edwards customers and the SME market," said Marty Snella, Chief Executive Officer. "More importantly, as trusted advisors to our customers, we will continue to bring solutions such as IoT, Wearables and Mobility to help extend the JD Edwards applications from the back office to the core processes of their business."

About Denovo
