

Reporting Workbench™

Polaris Associates Reporting Workbench delivers real-time Operational Reporting, Drill to Detail, Dashboarding, and Adhoc inquiry capabilities, in an architecturally integrated business intelligence package for the Oracle E-Business Suite.

With pre- built content encompassing Financials, Supply Chain, and HRMS for both 11i and R12, Reporting Workbench delivers on the promise of easy data access, better organizational insights, and one of the fastest times to value in the industry. Users can run reports within a 100% thin client browser interface, with the ability to extend reporting into popular desktop tools as their needs dictate.

Key Features

900+ Pre-Built Reports delivered, across Financials, HRMS, and Supply Chain modules.

Real-Time Data Access, while honoring E-Business Security.

Interlinked Reports enable Drill to Details, out of the box.

Empowers individual users to save their personal report parameters and configurations on standard reports.

Wizard driven Discoverer conversion utility included, enabling reuse of Discoverer reports with Reporting Workbench visualizations.

Publish reports to Excel, with live data refresh while maintaining your formatting and calculations.

Integrated with Oracle BI Publisher to produce Dashboard and Pixel Perfect Reports.

Multiple Output Formats: HTML, HTML Pivot, Excel, Excel Pivot, PDF, RTF, XML.

Document Bursting: enables parameter based reports for various users and groups, within a single report definition.

Reuse report Views across other Business Intelligence reporting platforms.

Schedule and email reports, with your choice of output.

Utilizes the same technology underlying the E-Business Suite, eliminating upgrade risks when you go from Release 11i to Release 12.

Advanced Visualization Options

Users can choose to view their reports in a variety of visualizations, including web based tabular and pivot tables, SmartGrid, Graphs, Charts, PDF, Excel, and Excel Pivot tables. Accessing the supporting details in any format is as easy as clicking on the summary total, with multiple level drills to the lowest level detail. Additionally, you can publish the content to Dashboards utilizing our Wizards, all in a single reporting platform.

Select	Request Id	Report Name	Phase	Status	Run Date	HTML	HTML Pivot	XML	CSV	Excel	Pivot Excel	RTF	PDF	Row Count	Shared By	Log
<input type="radio"/>	5799550	Missing Employee Info	Completed	Normal	07-Jun-2010 19:49:33									2		
<input type="radio"/>	5799552	Missing Employee Info	Completed	Normal	07-Jun-2010 14:12:18									2

<input type="radio"/>	5799563	Employee Assignment - Current	Completed	Normal	07-Jun-2010 12:34:31									1176		
<input type="radio"/>	5799564	Employee Assignment - Current	Completed	Normal	07-Jun-2010 12:25:58									1176		
<input type="radio"/>	5799558	Missing Employee Info	Completed	Normal	07-Jun-2010 12:18:50									2		

Executive Summary

The data for both charts and the detailed data from the table come from the same data set.

Figure 1: Average Salary by Department

Figure 2: Salary Spend by Department

Key Benefits

900+ Pre-Built Reports delivered, across Financials, HRMS, and Supply Chain modules. Produce reports in a fraction of time compared with traditional reporting platforms.

Drilldown's maintained in exported or "bursted" reports.

Assured Upgrade Path due to full compliance with Oracle's standards

Granular Admin features for Reporting Administrators - Eliminates the risk of runaway reports

Robust security for compliance with your security policies

Certified on Oracle On Demand

Reports Archiving feature allows you to store report outputs for auditing and historical reference.

Context sensitive help

Full support for user defined Excel Macros to produce Dashboard reports

Ability to build complex PL/SQL package based Reports

Include data sources external to E-Business in your reports

Share reports for user collaboration

Multiple report output formats to suit user preferences

Certified on E-Business Suite Release 11i and Release 12

Powerful "Bursting" feature

The ability to run a single report and generate multiple versions with personalized content for individual users or departments, and 'burst' them out in email. A critical component of any enterprise reporting solution, Reporting Workbench's Bursting capability not only puts the appropriate content in the appropriate inbox, but eases the maintenance associated with delivered reports.

Ease Of Administration

Reporting Workbench leverages the Oracle Applications security. Hence, any change in underlying Oracle security is automatically leveraged within Reporting Workbench. As Reporting Workbench is seamlessly integrated into the E- Business framework, user training is simplified and user adoption rates are high within the familiar user interface.

Reporting Workbench improves productivity by allowing users to collaboratively share their reports with their team. Reporting Administrators can organize reports in shareable folders for user and departmental collaboration.

Seeded End User Layer

Reporting Workbench comes seeded with business views across Oracle HCM, Financials, and Manufacturing modules to jump start your reports development projects. If you supplement your E- Business environment with a Business Intelligence platform, reuse the underlying framework of our reports across your organization. Reporting Workbench comes with a utility to migrate Discoverer End User Layer to retain your past investment in reporting.
