

Self-Directed Surveys

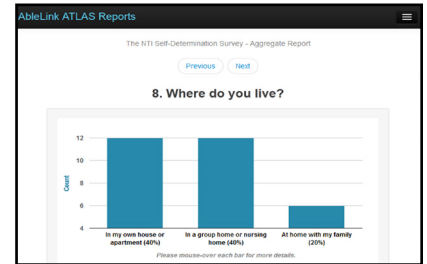

ATLAS

AbleLink's ATLAS* (Accessible Testing Learning & Assessment System) is a cloud-based service that allows individuals with cognitive disabilities to independently complete surveys, assessments, and tests using an iPad or Android tablet. Our cognitive design strategy also provides access for users with significant literacy challenges. ATLAS automates data entry by uploading surveys to a secure cloud-based server for immediate viewing of individual or aggregate results.

Many organizations struggle with the process of obtaining original, unbiased feedback from their clients. This may be especially true for agencies serving individuals with intellectual and other cognitive disabilities. Agencies are often faced with only two choices: Putting their staff in the position of gathering data evaluating their own services, or incurring the expense of hiring outside staff to carry out mandated surveys.

ATLAS is a customizable service that gives a direct voice to users who cannot read or write, and are thus prevented from independently completing written assessments (such as consumer satisfaction surveys). The easy-to-use touch screen interface, combined with AbleLink's evidence-based, universally designed software, allows individuals to communicate their feelings and opinions without having to rely on an interviewer or transcriber.

The creation of your ATLAS survey App begins with your organization submitting the questions/content to AbleLink. From that content, a customized App is developed – specific to your organization – that uses pictures and recorded audio to present survey questions to the user. AbleLink delivers the App ready to use, complete with your organization's branding as well as automated, cloud-based data entry and reporting tools.

The pricing structure for ATLAS is based on two components: 1) Startup cost for the development, setup, branding, and delivery of the survey App, and 2) Cost per survey taken.

ATLAS Pilot Survey - \$2500

The ideal way for your organization to assess the effectiveness of ATLAS with your clients! Pilot surveys include a basic customized app with up to 100 uses and data collection services for a three-month period. Pilot surveys are limited to a maximum of 15 questions and 5 responses per question. After the three-month pilot stage, you will have the opportunity to convert the existing app to a regular service.

ATLAS Survey Service

Are you ready to reduce your survey costs dramatically? The ATLAS Service opens the door to the full range of the software's capabilities for your organization. Startup costs are based on the size and type of content you provide, and the fixed cost per survey use is just \$5.00 (quantity discounts available).
