Jaguar Family of Products

The Jaguar family of products provides robust client and server side processing based on Robbins Gioia's unmatched and proven scheduling algorithms

Robbins Gioia (RG) products openly integrate with standard systems through the most scalable APIs in our chosen markets. Predicated on industry standard application programming languages (e.g., Java; VB.Net; C#.Net; ASP; C and C++; and other COM compliant languages) RG's Jaguar family of products reside in a category by themselves. There are no comparable software tools on the market that come close to matching the performance, flexibility, and extensibility of the Jaguar family of products.

Licensing

Jaguar Family License Specifications: Licensing across our family of products is based on a per platform and a per server basis. Per server is defined as hardware, virtualized environment, operating system, RDMS engine, and database instance which accesses the algorithm. Jaguar currently is supported on or within the following platforms:

Supported Platforms

Technology Foundations

- UNIX – HP-UX 11.31
- Windows – XP/2003/08/12 Server
- Windows xp/7/8

Database Management Systems

- Database – Oracle 10 or >
- MS SQL Server
- MY SQL

Web Servers

- MS Internet Information Server
- EA Server
- JBOSS
- Apache

Product Platforms

Historically our APIs and scheduling algorithms have been benchmarked against and integrated with enterprise scheduling solutions within

- SAP
- Microsoft Project Server

JCAT2020

- Jaguar - Cruncher**
- Jaguar - CCPM+**
- Jaguar - CCPM+ PRO**
- Jaguar - CCPM+ PRO Cruncher**
- Jaguar - Toggle**
- Jaguar - Evolver**

- Optimized production throughput
- Rapid adaptation to changing program and production priorities
- Easy integration into existing tool set resulting in lower operating costs
- Time saved as a result of project management systems acceleration
- Supports multi-tiered architecture

Enterprise commercial pricing for the Jaguar scheduling technology ranges from \$750 to \$1,000,000 per server and per instance. Multiple server and instance discounts are available.

Government Pricing: Call for Quote.

Baseline Pricing

Commercial pricing for products within the Jaguar family ranges from \$750 per seat for the client side version of our Critical Chain processing add-in for Microsoft Project, CCPM+, to \$1,000,000 for our server-side artificial intelligence algorithm Jaguar Evolver.

Jaguar Family of Products

CAT II	\$50,000	EOL 2015
JCAT2020	\$75,000	Per Server
Jaguar - Cruncher	\$500,000	Per Server
Jaguar - CCPM+	\$750	Per Seat
Jaguar - CCPM+ PRO	\$100,000	Per Server
Jaguar - CCPM+ PRO Cruncher	\$750,000	Per Server

Maintenance

Jaguar Maintenance: Robbins Gioia (RG) understands the importance of staying up-to-date with the latest releases of platform components. Since the release of CAT in 1985, RG has independently invested more than 30 million dollars in our core processing algorithms, which comprise today's Jaguar family of products.

RG will make a reasonable effort to provide updates no more than 90 days after the production release of platform dependent updates. More details on maintenance can be found in Robbins Gioia, LLC Software License Agreement.

Support Plan Options	Percentage of Total License Fee
All maintenance charges are:	
<ul style="list-style-type: none"> Subject to change based on "true up" or architectural review and identification of foundational operating platform components or "Supported Platforms" annually. 	
8/5	20% per year, per supported platform component
<ul style="list-style-type: none"> 8 hours per day/5 days per week 9 AM EST to 5 PM EST 	<ul style="list-style-type: none"> 20% of your original total software license purchase year First Year maintenance due at license execution
Upgrades	
Robbins Gioia offers 100% credit of original software purchase value towards any upgrade to a more advanced Jaguar family component(s).	

Support and Architectural Backed Technology Consulting

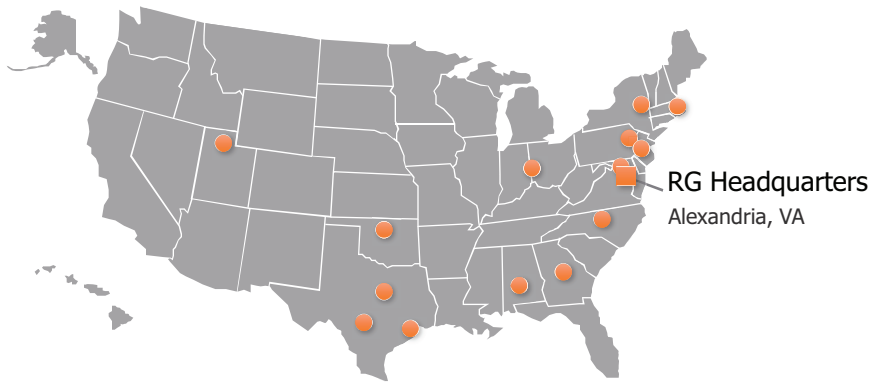

As markets shift and missions evolve there has never been a more critical need for organizations to maximize their technology investments across their enterprise to maintain competitive edge.

Robbins Gioia is a full service consulting and management firm uniquely positioned to assist government agencies or Fortune 500 corporations achieve their strategic technology objectives. Our Flagship capability area Enterprise Architecture and Analysis (EA2) and their integratable solutions, drives true innovation and requirements visibility across an organization while reducing risk and costs.

Our Technology Enhanced Performance (TEP) capability area and results focused solutions are designed to capture mission critical elements of your organization strategy and align them to your acquisition and deployment of business systems as well as your workforce.

Our Legacy

Robbins Gioia was founded in 1980 to focus on helping government customers avoid common sources of failure in implementing major programs. Our founders reasoned that by providing strong professional program management skills, fully independent of any conflicts of interest, they could provide a critical program oversight role and become trusted advisors to their clients. This basic vision, enhanced over the years by the addition of services related to key success drivers in technology and people performance, has produced consistently superior results and long-standing relationships with many client organizations in federal government departments and agencies, selected state government organizations, and leading private sector clients.

Throughout this period RG has provided valuable assistance to clients in defining and aligning goals to achieve success, designing and implementing program management offices and skills to guide the implementation of major programs and initiatives, defining and implementing optimized processes and support systems needed to manage those processes, and developing strategies and programs to assist with the human aspect of implementing major new initiatives.

Our commitment to sustain and build upon this focus on results and our position as a trusted professional advisor has never been stronger. We believe that the growing demands and pressures faced by our clients will continue to require the breadth of unique capabilities and dedication to excellence that RG represents.
