Brady Client Services Launches Two New Offerings: Confined Space Inventory and Classification Service, and Confined Space Procedure Audit

New services will help clients create, manage and sustain confined space safety programs

MILWAUKEE, Wis. (April 24, 2015) — [Brady](http://www.bradycorp.com) (NYSE:BRC), a global leader in industrial and safety printing systems and solutions, today announced that its [Client Services](#) group launched two new services: Confined Space Inventory and Classification Service, and Confined Space Procedure Audit.

“A successful safety system does not just consist of one area of safety – It includes all workplace safety issues and creates a sustainable management of change,” says Tim Bandt, global director of Client Services for Brady. “When clients need additional resources and expertise for their confined space tasks, we are here to partner with them. That’s why we’ve expanded our portfolio to support these activities and help our clients navigate to a sustainable program of safety and compliance.”

The [Confined Space Inventory and Classification Service](#) aligns with OSHA’s requirement for employers to inventory their facilities for permit confined spaces and annually evaluate their permit program. With this service, Brady comes onsite to collaborate with the client and help them better understand what is considered a confined space and a permit space. By coaching the client through whether or not the Confined Space Standard applies to them, they are prepared to take any necessary next steps to meet compliance.

The [Confined Space Procedure Audit](#) helps clients then comply with OSHA’s standard on keeping written confined space programs and procedures up to date. Best practice to reach this expectation is to perform annual audits, or re-auditing as workplace conditions change. This service includes an initial kickoff and training to review the scope and deliverables of the audit, as well as a tour of the facility. Next, Brady reviews procedures for accuracy and collects any data needed to improve procedure documentations.

These two new services are an addition to Brady’s comprehensive line of safety services. By partnering with Brady Client Services, clients benefit from the expertise needed to determine the next steps to reach compliance. Safety practitioners come onsite to work with clients and help them enhance knowledge, reduce safety risks and improve productivity.
