

**OneCampus**  
All campus services. One location. Any device.

## Simplify. Modernize. Analyze.

For many colleges and universities, campus portals were the early approach to organizing the complexity of campus services. Decades later, these portals lack a modern user experience or have become so cluttered they're almost unusable. For other institutions, campus services are scattered across various web pages that are difficult to search and navigate--especially on a mobile device.

OneCampus is a cloud-based service discovery platform that modernizes the way users locate and access campus information and applications such as email, class schedules, grades, and more, from any device.

Developed in partnership with Indiana University and vetted by six institutions during the Internet2 NET+ service validation process, OneCampus takes a fresh, new approach to organizing web-based campus services with its robust search, responsive design, and user ratings and reviews in an online marketplace format.

OneCampus is also system agnostic and connects to your campus-based authentication to allow for single sign-on to institutional services and applications.

## Why OneCampus?

- ✓ Give users an easy and intuitive place to find and access web-based campus services
- ✓ Organize commonly used services or tasks into groups by function or application
- ✓ Enhance awareness of campus resources with increased search engine exposure
- ✓ Provide service owners direct feedback to facilitate continuous improvements
- ✓ Quickly deploy and maintain your cloud-based tenant with minimal IT overhead

## What's Included?

rSmart provides everything you need to set-up, manage, and deploy OneCampus.

**One Location, Any Device**  
Easily find and access services, information and applications.

**Google-Like Search**  
Search or filter by category, campus, and/or role.

**Ratings and Reviews**  
Post reviews, rate tasks, or share feedback

**Distributed Publishing**  
Use workflows to delegate responsibility to owners

**Multi-Campus Support**  
Aggregate services for multiple campuses in one place.

**Institutional Look and Feel**  
Add your logos, colors, and style sheet to match your brand.

**Cloud Delivery & Activation**  
Quickly deploy your tenant with minimal IT overhead.

**Admin Training & Resources**  
Receive training, support, documentation, and free upgrades.

“**Search. Click. Done.** is the new standard in effectiveness for campus services. One.IU enables a fast and clear service outcome, and it is a must-have post-portal, modern approach for institutions looking to improve student, staff, and faculty experiences.”

Brad Wheeler, CIO at Indiana University

## About rSmart

For more than 15 years, rSmart has been delivering innovative solutions for higher education that reduce costs, improve productivity, and simplify the user experience. Born in the cloud, OneCampus provides students, faculty, and staff one place to find and access campus services from any computer or mobile device. Unlike cluttered campus portals or difficult to navigate websites, our modern approach is quick to deploy, easy to update, and allows users to spend more time on the task at hand and less time trying to find it. rSmart is privately held and headquartered in Scottsdale, Arizona.
