

Transforms your classic Windows apps into web, mobile, and cloud-ready apps!

VBUC

WebMAP2

Start with **VB6 Apps...**

 Classic Windows32 App

VBRun **VB6 Code**

Windows 32

or **C#/Winforms Apps...**

Microsoft **.net** Application

Windows Form **C# Code**

.NET framework

Get  mobile-ready, runtime free, **HTML5 Apps!**

ASP.NET

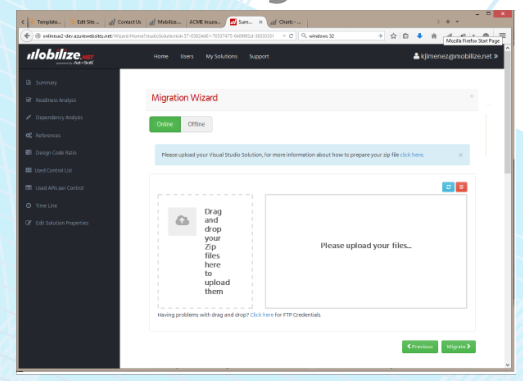

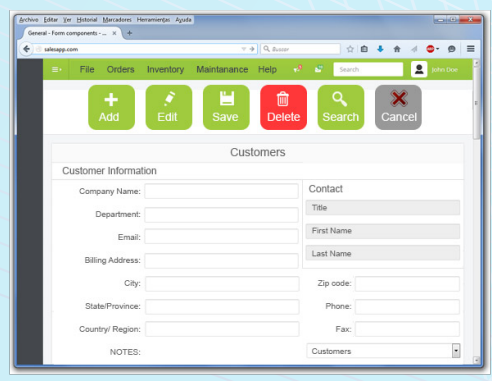

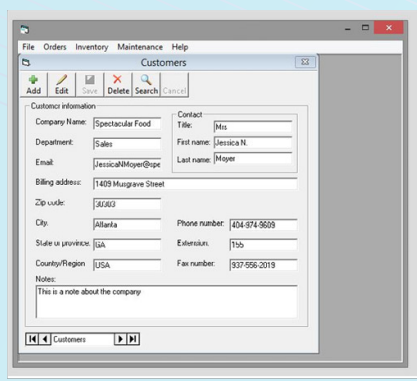

C# Code (biz logic, rules, DB)

.NET framework

Go from this

to this

using this

Try **WebMAP2** on your code or check out our sample apps or **Let us do the migration for you.**

We'll do a free proof of concept and show you your app on a phone
Go to www.mobilize.net/build-webmap2 for more info.

Get your **Windows Phone** app to **Windows 10 - fast**

Free Visual Studio Add-In

mobilize.NET
powered by Art in Soft®

Jumpstart your move to Windows 10.

This tool will parse and analyze the source code of your app and convert references to Windows 10 APIs.

- Converts Silverlight Windows Phone apps to Windows 10 apps
- Migrate workloads in 1/3 the time, 1/3 the normal cost
- Enables the top 80% of apps to be converted 80% of the way
- Includes mappings for top APIs and components
- Supports open source extensibility model – anyone can contribute mappings

Sign up for the pre-release!

Go to <http://www.mobilize.net/build> for more information.

Mobilize.Net provides services and support to move your app to **Windows 10**.
