Solutions

Innovative Solutions & Services for PeopleSoft
Common – Critical – Complementary

Extend
Functionality

- Pre-built, packaged, proven solutions
- Highly configurable – tailor to YOUR needs
- Customer driven requirements
- Affordable
- Integrated with existing PS apps

Improve ROI

- Architected as add-on solutions
- Avoid customizations
- Low-cost
- Minimal risk
- Release independent – no upgrade required
- On Premise solution

Get Faster
Results

- Rapid implementation
- Deep PeopleSoft knowledge & experience
- Unique best practices for implementations & upgrades

Leverage Existing
Investment

- PeopleSoft data model and existing data
- Current PeopleSoft business rules and processing
- End-user PeopleSoft skills
- Infrastructure and technology

Challenges with Security and Segregation of Duties

Security and Fraud

- US Fraud averages \$150,000, 22% exceed \$1m
- The average time to finding Fraudulent activity is 18 months

See:

<http://www.fraudweek.com/uploadedFiles/Fraudweek/content/documents/cost-of-complacency.pdf>

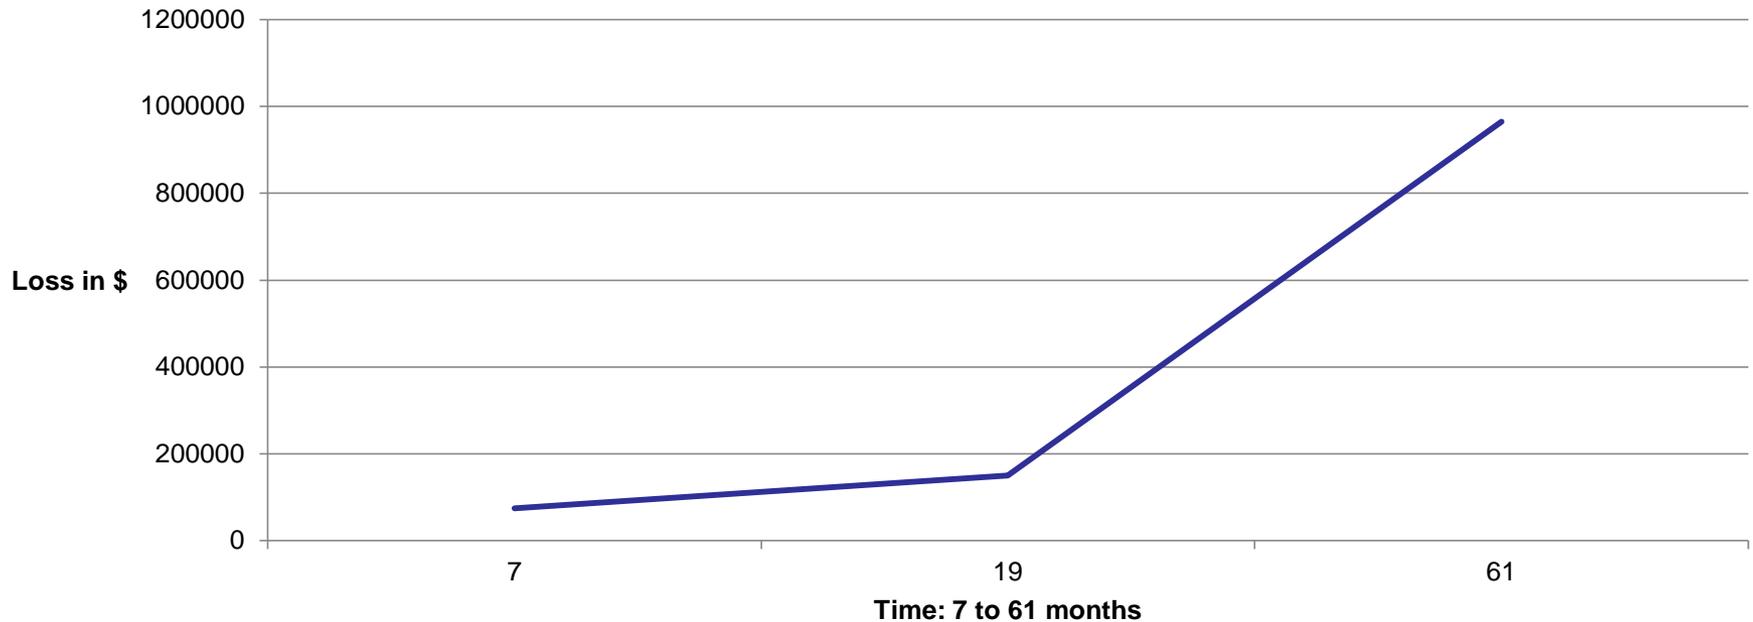

The impact of time

\$75k loss at <7 months

\$150k at 19 months

\$965k at 61 months +

Loss over Time

ProActive Vs Reactive Measures

Surveillance / Monitoring, IT Controls:

\$59k

Tip or Confession:

\$184k

Notification by Law Enforcement:

\$1.25m

“PROACTIVE MEASURES catch fraud sooner and minimize losses. Frauds that are caught by reactive measures last longer and cause more harm.”

Auditor's Perspectives

- Greater focus on Mobile workers, 28% of breaches were caused by remote workforce
- Less reliability on documentation that can be edited without trace – i.e Spreadsheets
- More Continuous Controls monitoring – audits once a year are not enough
- Greater focus on Internal Audit reporting to Senior Management – identify key Data and Risks associated

Case Studies

Financials: Falsified checks written to an AP Clerk's personal accounts for 4 years totaling \$1m, payments covered up. No SoD in place.

Campus Solutions: 'Fake' Courses offered to 3,100 students with little academic work involved. Assistant was able to create the 'fake' courses.

HCM: \$84,000 embezzled by HR Employee falsifying Payroll information between late 2012 and early 2014

Security Pain Points in PeopleSoft

- SQL the data out and cross reference the information before presenting it in a User friendly way – time and resources?
- How do you make sure you have covered everything and that the data is accurate?
- Results stored in Spreadsheets are prone to be manipulated and in turn may need auditing
- How to deal with false positives? What if Users are Read Only and do not have update authorities
- Once issues have been identified, how can a more proactive approach be taken to avoid them again in the future?
- How to manage exceptions and change?

Example Query from PeopleSoft

Report on Permissions List

Smart SoD™ Overview

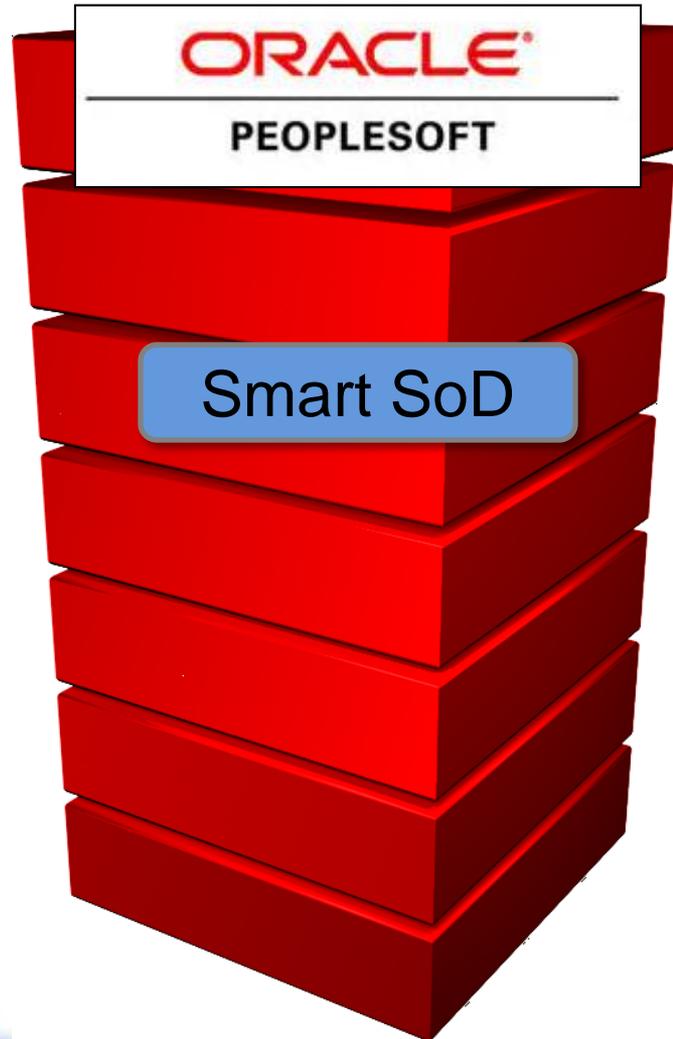

Delivery - Embedded

Deploy into any version of PeopleSoft,
same look and feel – easy learning curve

Delivery - Fully Managed

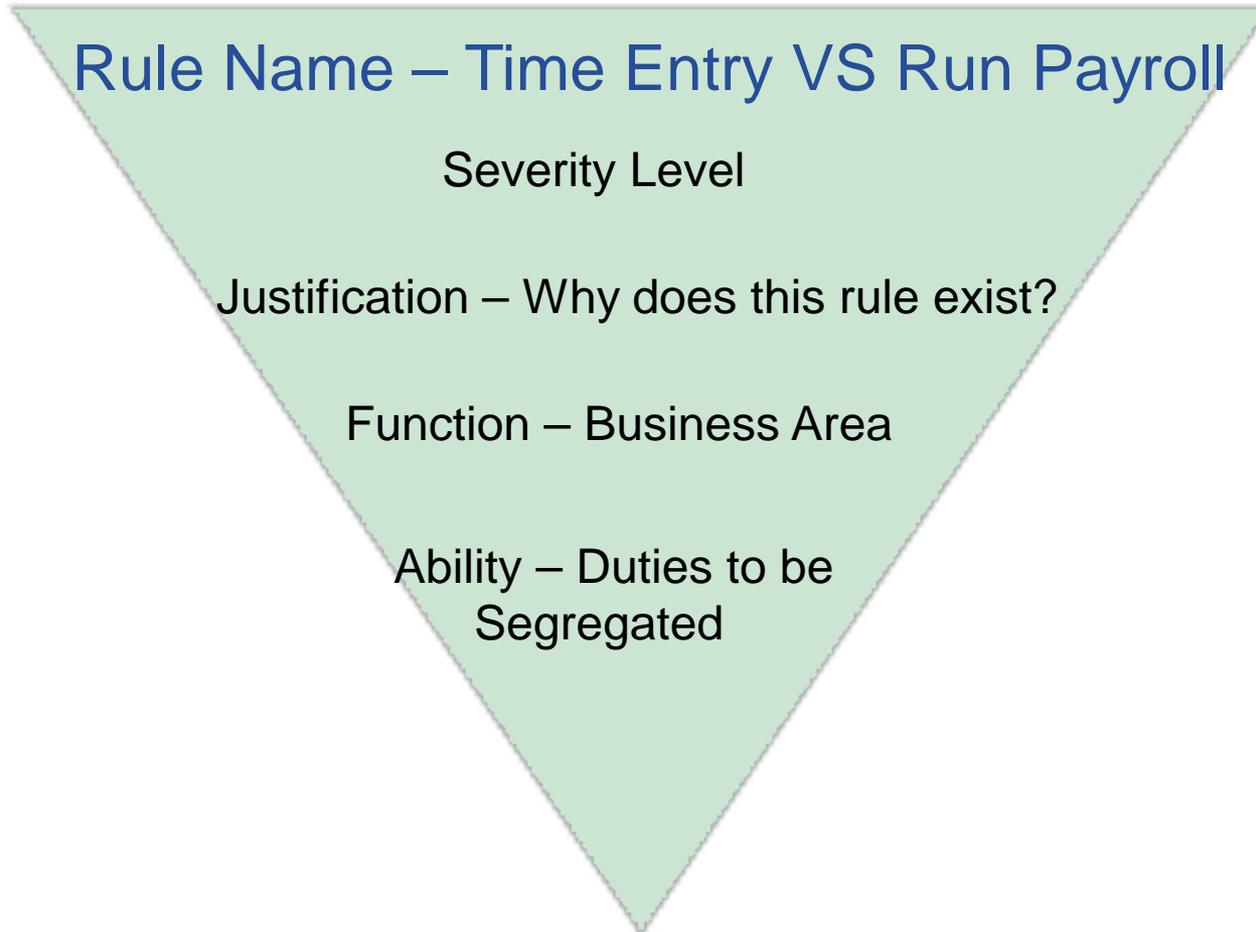

Deploy as a Service

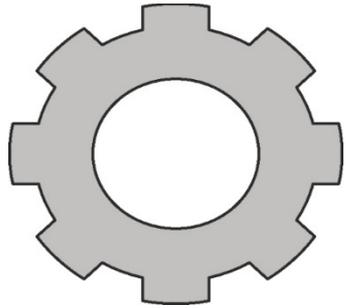

Smart Segregation of Duties

- Create and Manage Rules in a Structured Format, taking into account Authorities
- Powerful Engine reads through Security and Access to determine who is in Violation of the Rules
- Pro-Actively validate changes to User's Access and then commit once satisfied
- Dashboards and Analytics for rapid Root Cause Analysis

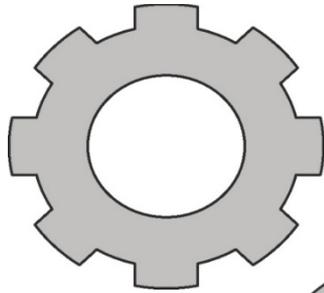

Segregation of Duties Rule Structure

Creation of PeopleSoft SoD Rules

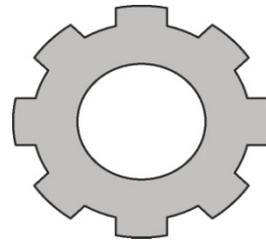

Role Level (high level)

Permissions Lists

Component/Page

Module-Specific
Security

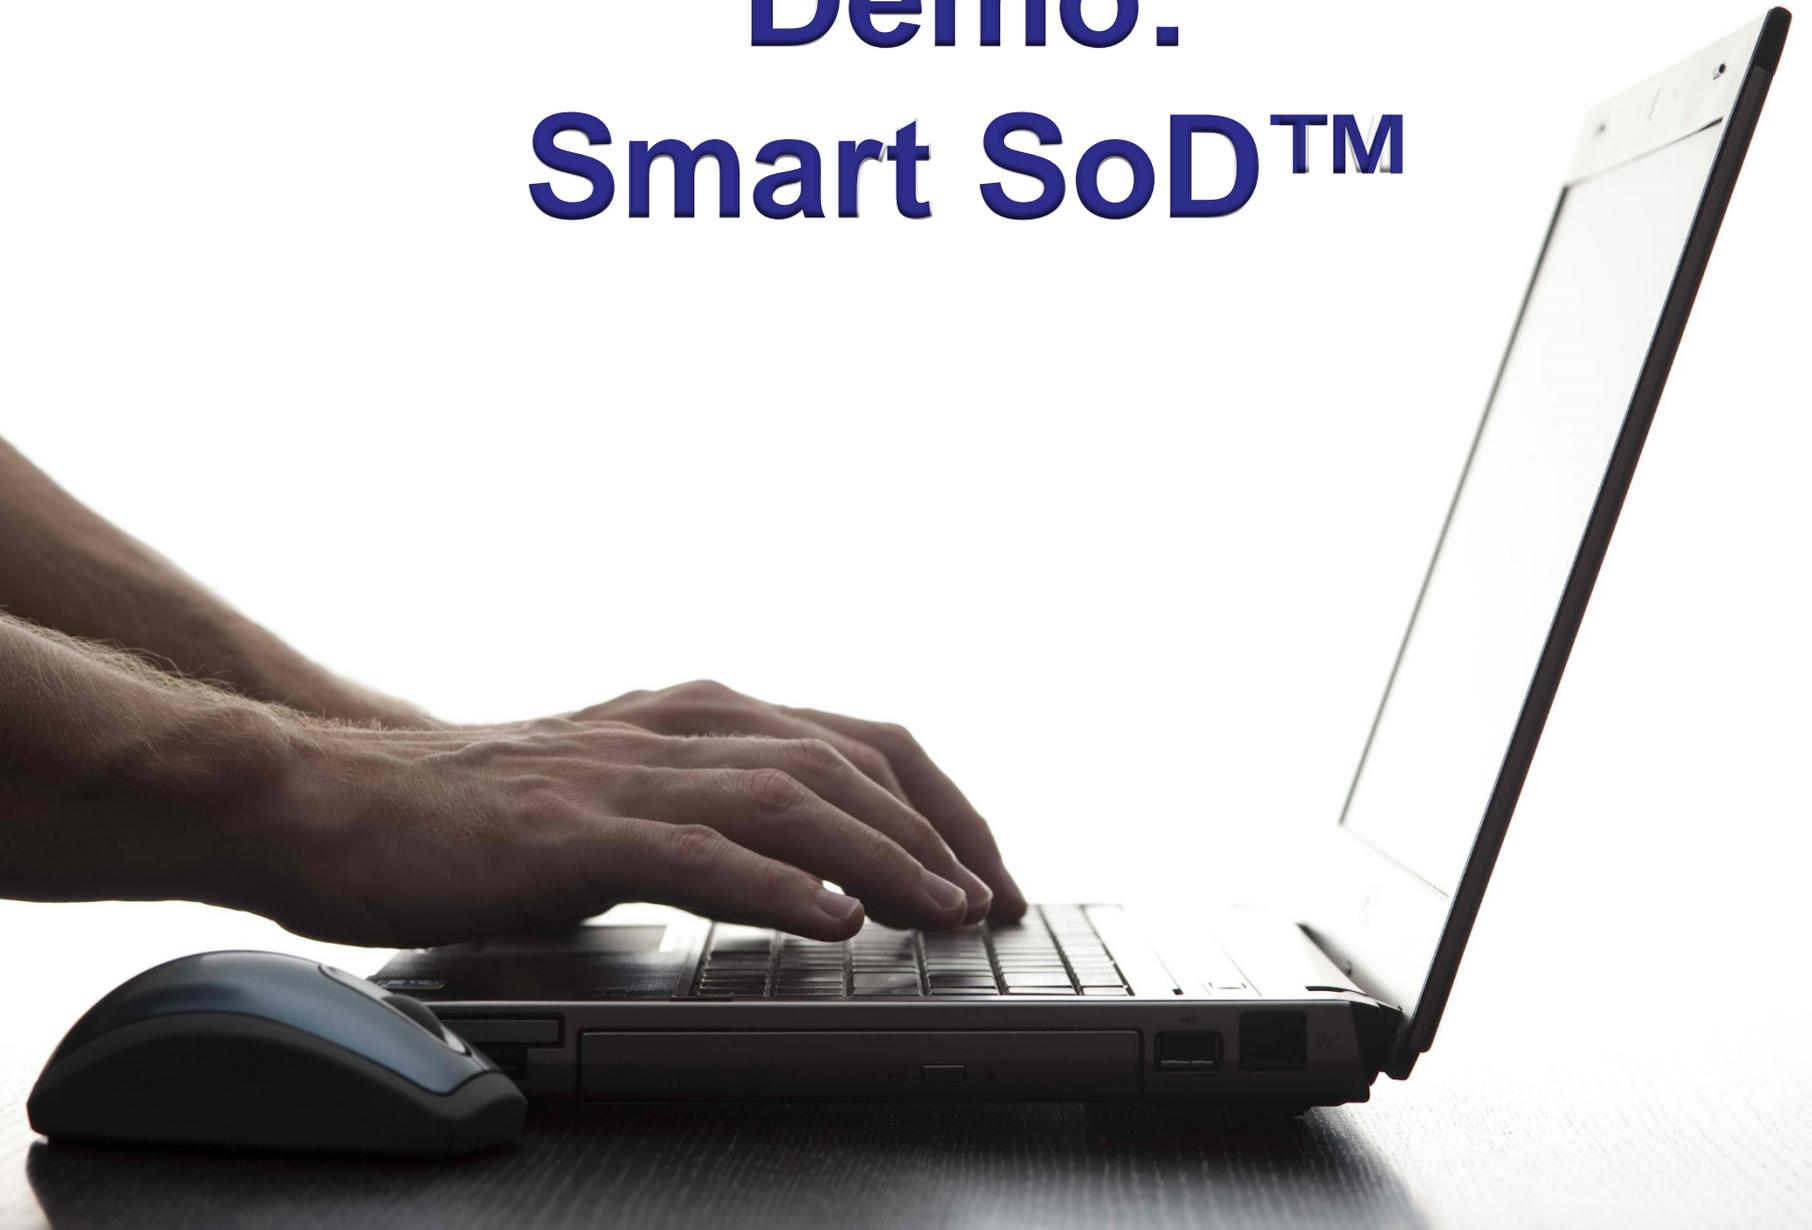

Mitigations & Workflow Approval

- Enter Notes and Expiry Dates for Users that need to break the Rules
- Run through Workflow Approval
- Workflow Approval can be assigned to virtually any PeopleSoft process
- Multiple Routing and Proxy enabled
- Prevent someone from Creating and Managing a University Course alone!

Demonstration Agenda

- Review the Analytics/Reports
- Understanding the structure of the Rules & the Engine
- Working with Users that need to 'Break the Rules'
- Pro-Active SoD
- Questions

Demo: Smart SoD™

Value Statement

Security and Segregation of Duties is an important element of your overall PeopleSoft security and risk management

Key Features of an automated solution can help you maintain legislative compliance (SoX), meet audit requirements and reduce the likelihood and impacts of fraud and errors

- Expressly designed for your current PeopleSoft
- Powerful Proactive, Reactive and Mitigation Features
- Automated Workflow Approvals
- Reporting/Dashboards facilitate audits and compliance
- Use pre-packaged built-in security and SoD rules or easily create your own
- Add-on Architecture Lowers Total Cost of Ownership
 - Seamless Integration
 - Utilize Best Practices
 - Maintenance and Upgrades

Q & A

sales@smarterp.com

The screenshot displays the GoToWebinar control panel. At the top, there is a menu with 'File', 'Options', 'View', and 'Help'. Below this is a red 'In Practice Mode' banner with a 'Start' button. The main area contains several interactive elements: 'Audience View' (100%), 'Screen Sharing', 'Webcam', 'Audio', 'Dashboard', 'Attendees: 1 out of 1001', and 'Polls (0/0)'. A 'Questions' section is expanded, showing a table with columns for 'X', 'Question', and 'Asker'. Below the table are 'Send Privately' and 'Send to All' buttons. A 'Chat' window is also visible, containing the message: 'Welcome to the webinar. We will begin shortly.' At the bottom, there is a dropdown menu set to 'All - Entire Audience' and a 'Send' button. The footer of the interface includes the text: 'Automating PeopleSoft Segregation of Duties: HCM/Financials/Campus Solutions', 'Webinar ID: 724-554-866', and the 'GoToWebinar' logo.
