

LINCOLN
LEARNING
SOLUTIONS

EMPOWERING ALL STUDENTS TO OWN THE STANDARDS

Lincoln Learning Solutions understands your mission – to build successful, unstoppable thinkers who “own” their pathways to college and career readiness. In fact, as a nonprofit educational solutions organization, we’re redefining the Pre-K to Grade 12 learning experience by connecting the most differentiated, customizable digital curriculum with the best in-class, teacher-supported instruction.

That’s why we focus on providing students with the opportunity to own the standards through the most effective modalities of learning – and all using a single platform approach.

We empower schools and districts with multiple implementation choices for providing these deep learning opportunities, using customized blended learning models, virtual course support, and virtual school scaffolds. We know that, in the end, all students can be on a pathway to owning national and state standards.

THE LINCOLN CURRICULUM

Four Distinct Models to Engage Our Curriculum

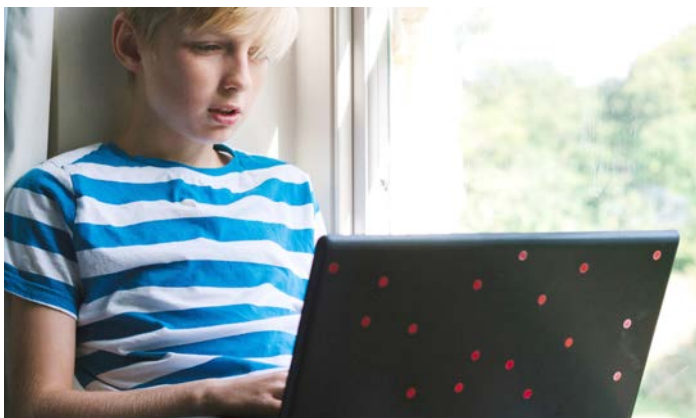

BLENDDED SOLUTION

Supporting all district, school, and classroom implementation needs, the Blended Solution combines impactful teacher instruction with access to content in a 24/7 format. From station and lab rotation models to the flipped classroom model, Lincoln curriculum maximizes the power of technology and the expertise of teachers to help all students move most efficiently along the pathway to college and career success.

COURSE SOLUTION

In a cost-effective manner, Lincoln Learning's Course Solution makes it possible for schools to meet the needs of students who want to learn in subject areas that otherwise would not be available or accessible. Course Solution also offers credit recovery programs that are affordable, rigorous, and instantly and easily customized to meet the unique needs of individual students.

VIRTUAL SOLUTION

More and more schools are seeing the need for – and value of – offering a full-time virtual school option to students. Whether it's to meet the needs of diverse populations, to provide a compassionate and high-quality alternative for students dealing with challenging personal circumstances, or to compete effectively with other educational choices, Lincoln Learning's Virtual Solution provides full course support from Pre-K through Grade 12.

SELECT SOLUTION

The unique Select Solution places our curriculum – and the students, teachers, administrators, and parents we serve – in a class by itself. Capitalizing on a fluid design for personal lesson building, the Select Solution offers our partner schools the ability to create their own distinct course offerings, specialized programs, and targeted initiatives that meet the specific goals and requirements of their communities.
