

## About QualTex Laboratories

QualTex Laboratories is one of the largest independent nonprofit testing laboratories in the United States. The laboratory is FDA- and ISO 9001:2008-registered, CLIA-certified and is an approved and/or accredited testing facility by multiple companies and health ministries worldwide.

QualTex is a partner in the critical mission of saving lives and supporting global public safety by providing advanced testing services for blood, plasma and tissue donations, reference testing and clinical research for patients, donors and regulated biological products.

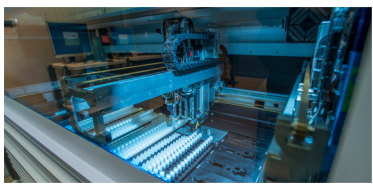

We understand the need for accurate, timely and cost-efficient test results. Our focus is meeting customer turnaround times to maximize the availability of products. Because QualTex tests millions of samples every year for clients around the world, our laboratories can handle large volumes quickly and effectively.

Our services include:

### Infectious disease testing

QualTex conducts a variety of infectious disease testing including for Anti-HIV 1/2, Anti-HCV, HBsAg, Anti-HTLV I/II, Anti-HBc, syphilis and Chagas. Additionally, QualTex performs the following NAT assays: HIV, HCV, HBV, HAV, West Nile virus and Parvo B-19. Custom panels are available upon request.

### Immunoematology Reference Laboratory

QualTex offers a broad range of services to address specific needs. Services include compatibility testing (ABO and Rh, antibody screen and crossmatch), consulting in areas such as antibody ID and antibody titers and red blood cell phenotyping by serology and genotyping.

### Microbiology testing

QualTex's microbiology laboratory performs a variety of testing services including bacterial detection, aerobic/anaerobic identification, fungus identification, yeast identification, MRSA sensitivity, environmental culture testing, sterility testing, Biological Indicator testing and moisture residual testing.

### Specialized testing

QualTex performs the following confirmatory assays: HIV-1 Western Blot, HIV-2 EIA, HIV-2 Western Blot, HBsAg Neutralization (PRISM) and TP-PA (syphilis confirmatory). Titers and other assays are performed upon request.
