Three Cloud Solutions in ONE

3

Do away with that old fax server

No Hassle

Simple Monthly Fee

CloudFax400

CloudFax400.com is our latest enterprise FAX solution, designed specifically for companies sending and receiving FAX transactions from an IBM mid-range system or Windows network.

With CloudFAX400 you can:
- **Eliminate** the cost and hassle of your FAX server hardware
- **Save** money by dispensing of expensive fixed telephone lines
- **Reduce** points of failure in your Enterprise FAX processes
- Provide a totally secure and hassle- free solution for your FAX transactions
- Get full support and only pay for what you use

impsCLOUD

impsCLOUD.com is a hosted, high-volume messaging service specifically designed for the enterprise.

Integration to iMPSCloud.com is via a very simple, very powerful and universally used set of web services. Access is via common browser interface.

Anyone, Anywhere, Anytime

**Save on fax server maintenance
Save on phone line rentals
Free up your support resource**

iMPS-FoIP

iMPS-FoIP enables you to do away with your fax server hardware by virtualizing it into your internal network.

Organizations have come to realize the cost savings and productivity benefits that derive from deploying a FoIP server. In fact, even if you don't have a VoIP network, you can still implement FoIP and virtualize your fax servers. Unlike traditional fax server implementations, which are connected to the phone network (PSTN) directly or through a PBX, FoIP works via a T.38 protocol that describes how to send a fax over a computer data network.

You Choose How You Install

Install With Existing Fax Server As DR/HA System

Simple Monthly Fee $200 Per Month Includes First 2000 Pages
