

## Automated wire termination

Automating the termination of wire gauges from 20awg to 56awg  
Soldering to IPC CLASS I,II, III  
Exceeds all Ionic contamination spec's  
RoHs compliant  
Automation speeds up to 6 seconds per conductor, zero location errors  
No human operator variables, whole process is automated, eliminates all scrap  
No limitations in the connector design requirements  
All connector types can be retrofitted for automation  
ISO-13485, ISO-9001, ITAR registered

52 gauge nichrome wetted

52 gauge nichrome wire

42 gauge wire
