

**FOR IMMEDIATE RELEASE**

## **GREENE, TWEED TO SHOWCASE PRODUCTION-READY SOLUTIONS AT 2015 PARIS AIR SHOW**

*Kulpsville (June 2015)* – Greene, Tweed has announced that it is exhibiting at the 2015 Paris Air Show as a global partner for high-performance engineered solutions for the aerospace industry. From trusted sealing systems in landing gear and fuel systems to innovative thermoplastic composite components for structural metal-replacement applications, Greene, Tweed delivers proven and production-ready technologies for the most challenging aerospace environments.

Greene, Tweed will showcase several products at this year's Paris Air Show:

### **High-Performance Sealing Systems**

Greene, Tweed high-performance sealing systems are the gold standard for critical aerospace applications. With exceptional versatility and superior system performance, Greene, Tweed sealing systems are currently found on over 90% of the world's aircraft.

### **Arlon® 3000 XT**

Arlon 3000 XT is Greene, Tweed's newest engineering thermoplastic that delivers enhanced performance in extreme high-temperature environments such as fire seals. Greene, Tweed continues to test and expand this advanced technology to new Aerospace applications.

### **Xycomp® DLF®**

Greene, Tweed recently announced the commission of additional state-of-the-art composites manufacturing equipment to support the ongoing growth of production program awards for components produced from Xycomp DLF – a discontinuous long fiber thermoplastic composite. Xycomp DLF technology targets complex-shape metal part replacement for key weight savings and other benefits. Greene, Tweed has refined Xycomp DLF design, analysis, and processing methods in recent years to deliver a broad range of DLF components. This has led to successful adoption by several major commercial aerospace OEM's and Tier 1's including production engine, nacelle, and interiors applications. Greene, Tweed now has over 300 Xycomp DLF parts on series-production Airbus, Boeing and Bombardier aircraft across 10 different aircraft platforms.

**To learn more about these and other aerospace solutions from Greene, Tweed, visit them at Hall 2B, Stand G156 at the Paris Air Show, which runs 15-21 June. You can also learn more by visiting [www.gtweed.com/markets/aerospace](http://www.gtweed.com/markets/aerospace).**

*Greene, Tweed leverages expertise in a variety of markets and products to give customers the most innovative solutions to meet performance challenges and reduce total cost of operation. With fully qualified engineering, sales and support personnel located throughout the Americas, Europe and Asia, Greene, Tweed delivers solutions to individual customer applications on a global scope. Greene, Tweed products are sold and distributed worldwide. For additional information, contact Greene, Tweed at +1.215.256.9521 or visit our website at [www.gtweed.com](http://www.gtweed.com).*
