

ROCKLER'S NEW HD CLAMP RACK PROVIDES ORGANIZED STORAGE USING MINIMAL SPACE

MEDINA, MN (June 11, 2015) - Rockler Woodworking and Hardware has introduced the HD Clamp Rack, a storage device made to house twelve pipe or parallel clamps while using minimal wall space. The heavy-duty rack solves the common problem of tangled stacks of clamps occupying an entire corner of wood shops and garages.

As important as keeping clamps off the floor and out of the way is being able to retrieve them from the rack at a moment's notice when they are needed for a project. Users simply lift the clamps out of the storage slots and get right to clamping. When finished, the clamps store neatly in two rows on the rack.

"The HD Clamp Rack turns tangled clamp piles into an organized display," says Dan Wenning, Rockler's director of product development. "It also allows access to the clamps in an instant, so that time normally spent hunting down and untangling clamps can be spent clamping instead."

Each HD Clamp Rack features six clamp slots on each side. Each slot can accept either a pipe clamp or a parallel clamp, and fit a majority of clamp designs on the market. The heavy-duty twelve gauge steel construction and two-piece reinforced design provides support to eliminate sagging. The narrow footprint is only nine inches wide. Mounting hardware is not included; 3/8" x 1.5" long lag bolts or larger are recommended to hang the rack.

The HD Clamp Rack (57164) is priced at \$39.99 and can be purchased at Rockler Woodworking and Hardware stores nationwide, Rockler.com, or from the Rockler catalog. For store locations or a free catalog, please visit www.rockler.com or call 1-877-ROCKLER.
