

DESCRIPTION

The **CBS ArcSafe® RSA-73A** is a custom-designed and built remote switch actuator that allows technicians to remotely charge, close, and/or trip General Electric Type HPC High Pressure Contact Switches from a safe distance while remaining stationed outside of the arc-flash boundary. Installation and operation of the CBS ArcSafe RSA-73A is quick, simple, and does not require any modifications to the existing electrical equipment. The RSA-73A is compatible with all styles of GE Type HPC Switches. Typical applications of these switches include main service, feeder, and branch circuit disconnects, as well as both transformer and large motor disconnects. The CBS ArcSafe RSA-73A is a safer and more cost-effective solution when compared to other arc-flash mitigation alternatives.

SPECIFICATIONS

WEIGHT:	22 lbs
DIMENSIONS:	8.75"H x 24.5"W x 7.5"D
POWER CONSUMPTION:	50W
OPERATING DISTANCE:	25-300 feet
COMPATIBILITY:	General Electric Type HPC High Pressure Contact Switch 800-1600A (Manual or Electric Trip, Bottom Feed Standard)
CONTROL/POWER SOURCE:	CBS ArcSafe® RSO-IIID Control Console

OVERVIEW

- Remote operation from up to 300 feet away
- Lightweight and portable for hard-to-access areas
- Simple setup, no equipment modification required
- Quick installation and removal from gear
- Adjustable travel and locators to accommodate entire product line
- Reduces or eliminates need for arc-flash hazard suits
- Eliminates all hazardous manual contact with gear during operation
- Designed, manufactured, and assembled in the USA
