## **FOR IMMEDIATE RELEASE**

### **Analytic Systems celebrates "Best In Class" Quality Rating from SRCTec**

June 2, 2015, Delta, BC, Canada

Analytic Systems is celebrating the 100%, 2nd Quarter 2015, Quality Supplier Scorecard just received from SRCTec (a subsidiary of Syracuse Research Corporation).

This Supplier Scorecard rating proves we are all working together to provide the best product and service to our customers. "We are very proud to have been a part of SRCTec's 'Best Value' vendor group since we started working with them", says Bill Walker, Director of OEM and International Military Sales.

Analytic Systems has been providing Military Power Supplies to SRCTec, specifically modified to meet the US Army's rugged requirements to operate their portable radar system. Analytic Systems has been working with SRCTec and the US Army since mid-2004 on the design, upgrades, modifications and production of the original PWS1510MS-26.0 and now the PWS1505MS-26.0. Over 8000 units of the PWS15xx series units are currently in theatre.

The US Army's portable radar operates in the battlefield, protecting Warfighters from enemy fire. The radar systems can be networked together to increase the safety of soldiers, as doing so greatly enhances the system's accuracy in estimating the enemy's location. The portable radar will provide low-cost/high-reliability forward operating base protection that can handle a variety of threat situations with great reliability to warn personnel of an incoming threat. Analytic Systems, [www.analyticsystems.com](http://www.analyticsystems.com) is proud to be a partner with the Army in this project designed to save Warfighter's lives.

Analytic Systems is committed to highly reliable, innovative and cutting edge technology in the design, development and 'Made in North America' production of Military DC/DC Converters, MPPT Solar Charge Controllers, Inverters, Battery Chargers and Power Supplies. Military clients include Raytheon, Northrop Grumman, NASA, the US Marine Corps, Lockheed Martin, Textron Systems, Navistar, BAE, the US Navy, the Canadian Armed Forces, the US Army, DEW Engineering, Boeing, AAI Corp., the US Marine Corps, Force Protection, Anniston Army Depot and FLIR.
