OnRamp Announces Customer Case Study Featuring Prelude Dynamics

AUSTIN, TX – OnRamp, a high security and hybrid hosting provider with data center facilities in Texas and North Carolina, announced today the publication of a new case study featuring long-time customer, Prelude Dynamics. The case study details the challenges Prelude Dynamics faced in finding a secure solution to house their IT environment and was backed by 24/7 monitoring and hands-on support.

Prelude Dynamics, a global provider of customized web-based Clinical Trial Management Systems, aids in the research efforts of clinics, universities, Contract Research Organizations (CRO) and other businesses performing human and animal health studies. Due to their interaction with sensitive data, including intellectual property, Prelude Dynamics turned to OnRamp to help them meet the stringent requirements for maintaining the confidentiality, availability and integrity of this data within OnRamp's data center.

As an SSAE 16 audited and HIPAA compliant company, OnRamp operates multiple enterprise-class data centers for companies like Prelude Dynamics with high security needs and sensitive data. OnRamp's processes, systems, and people are rooted in the most comprehensive and advanced technology in the industry to ensure the confidentiality, availability and integrity of customers' computing infrastructure and sensitive data. And, OnRamp's Full7Layer Support team of engineers are available onsite 24/7/365 to assist colocation customers with in-rack requests from routine racking and stacking to more complex, time-sensitive emergencies.

"OnRamp goes above and beyond the abilities of most [colocation](#) providers, to assist our company with tasks such as monitoring, backups and configurations on an as needed basis," noted CEO Richard Tieken. "This provides great assurance that, if needed, we can call on their team to assist with any variety of tasks to keep our platform running smoothly."

For more information about Prelude Dynamics decision to use OnRamp as their colocation provider, download the case study today: <http://www.onr.com/free-colocation-resources/case-study-prelude-dynamics/>

About OnRamp

OnRamp provides computing infrastructure for companies that require high levels of security and availability. As an SSAE 16 SOC I Type II audited, PCI Level 1 and HIPAA compliant company, OnRamp operates multiple enterprise class data centers to deploy hybrid solutions built on cloud-delivered computing capacity, managed hosting and colocation services. OnRamp specializes in working with companies to ensure compliance in the healthcare, financial services and other industries with high security needs, helping them meet the rigorous compliance requirements associated with HIPAA, PCI, SOX, FISMA and FERPA. <http://www.onr.com/>
