EVLUMA ConnectLED™
WIRELESS CONTROLS SOFTWARE

FOR AREAMAX™ LED LIGHTING

CLED PC
CLED TBL

DESCRIPTION
ConnectLED is a software application that communicates with the AreaMax LED luminaire for area and security lighting via BLE (Bluetooth Low Energy). Enhance energy efficiency with dimming and custom brightness settings. Reduce maintenance costs with connect and disconnect functions. Every AreaMax comes with FaultCast built-in. Use ConnectLED to easily read these maintenance transmissions from the ground. Maintain fixture uniformity - broaden AreaMax applications with this easy-to-use software.

ConnectLED:
Laptop (dongle) and Tablet versions available.

ENHANCE ENERGY EFFICIENCY AND REDUCE MAINTENANCE COSTS.

Dimming
Maximize energy savings when setting custom dimming schedules for anytime between dusk and dawn. Dimming range is between 100% to a 20% glow.

Custom Brightness
The AreaMax delivers .01 fc at up to four mounting heights. Need less light due to location (light trespass), or energy budget? Define brightness settings that also save energy. Perfect for light sensitive areas. Match with the full-cutoff AreaMax for the best Dark Sky Friendly results.

Connect/Disconnect
Easily manage the use of electricity from the ground during the transfer or disconnection of service and save on maintenance. Perfect for areas that only require seasonal lighting.

FaultCast Maintenance Transmissions
Every AreaMax comes with FaultCast built-in. Use ConnectLED to activate this handy maintenance feature that reads the status broadcast from the AreaMax during the day - the hardest time to troubleshoot a light!

Operating Platform
ConnectLED runs on Windows 7 or Windows 8.1 (laptop recommended) with a licensed dongle, or on an Android Tablet.

Range of Operation
Operates up to 150 ft from the luminaire. Line of sight recommended.

Licensing
ConnectLED connects to each AreaMax individually using the AreaMax's unique MAC address. Promo license packs of 8 are available when purchasing a 4 x 4 promotion. Have a larger installation base? Let us work with you to develop a roll-out plan.
Connectivity
ConnectLED uses Bluetooth Low Energy (BLE). Every AreaMax is shipped from the factory with the ability communicate with ConnectLED. Activate management and energy saving features at any point during your AreaMax ownership.
