

FormJet[®] Internal

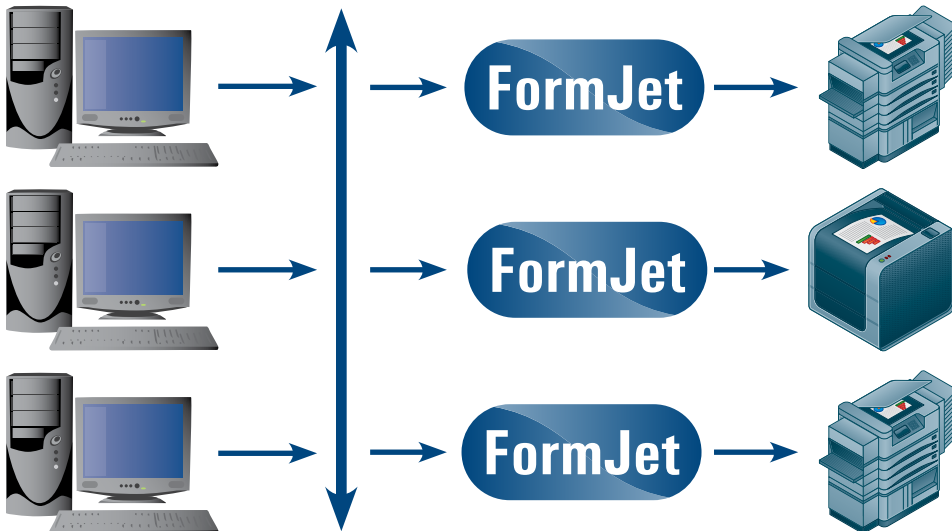

On-the-Fly eForms & Print Job Reformatting

- ✓ eForms
- ✓ Automatic Barcoding
- ✓ Print Job Reformatting

FormJet Internal install in an expansion slot located within HP LaserJet printers. FormJet accepts print jobs bound for the printer, reprocesses them to fulfill your company's modernization goals, then forwards the jobs for printing. No modifying your ERP, EMR, or other enterprise systems. No additions to your sensitive servers.

Reprocessing can include simply adding barcodes or electronic form backgrounds to eliminate purchasing preprinted forms. More sophisticated reprocessing can extract data from existing print jobs for complete reformatting to produce entirely new modernized output. Since FormJet Internal never retains any of the print job data, no potential exists for violating HIPPA or other privacy regulations.

FormJet Internal arrives as a small add-in module with your solution preinstalled. The module easily installs in an expansion slot located in most enterprise class HP LaserJet printers. No configuration required.

about us

TypeHaus designs and manufactures printer hardware devices and software solutions to support enterprise applications requiring enhanced printer resources. TypeHaus is recognized by Fortune 500 companies for its expertise in print stream control, line of high-quality products, and unparalleled pre-sales and post-sales customer support. TypeHaus solutions enable current and legacy systems to take advantage of the latest printing technologies. We are a stocking supplier of check stock and MICR toner. We have been providing solutions for critical document printing since 1992.

advanced PDF and email solutions

TypeHaus also offers the FormJet Enterprise solution that includes advanced features such as PDF archiving and email distribution.
