

Advanced Supply Chain Software™

for Microsoft Dynamics® AX

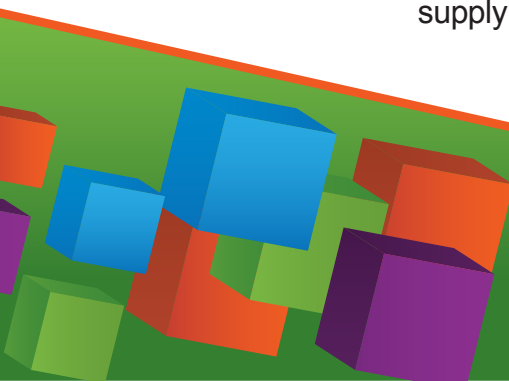

ADVANCED SUPPLY CHAIN MANAGEMENT™

Most companies today realize that their supply chain is a key differentiator. They know they need the visibility and insight that only a modern supply chain software solution can provide. That's why savvy distribution companies worldwide have selected Advanced Supply Chain Software™ powered by I.B.I.S. Inc. to augment and round out their Microsoft Dynamics® AX solutions.

THE MODERN SUPPLY CHAIN

Advanced Supply Chain Software™ helps you to manage supply and shape demand for the optimum balance to maximize revenue and minimize costs. Supply chains aren't really like linear chains – they're more like networks connecting a complex web of suppliers, service partners and customers and are only as strong as the weakest chain link. If you're struggling with the demands of modern global supply chains, you need Advanced Supply Chain Software™ to provide the visibility to manage your supply chain for success.

Advanced Supply Chain Software™ for distributors offers so much more than applications that manage a single aspect of your supply chain. You get comprehensive end-to-end advanced supply chain functionality built by industry experts to address the full depth and breadth of your supply chain needs. Improve supply chain velocity, exceed customer expectations and optimize your profitability – all with industry proven Advanced Supply Chain Software™.

ADVANCED SUPPLY CHAIN SOFTWARE™ COVERING EVERY ASPECT OF A MODERN SUPPLY CHAIN

Designed to work seamlessly to optimize your overall supply chain performance.

Advanced Revenue Management™

A powerful pricing and cost management solution that optimizes pricing for improved profitability. Demand shaping is the most effective way to balance supply and demand, but pricing and promotions can be complex to manage without cutting too deeply into margins.

Advanced Order Management™

Order management is more than just order entry. You also need stock visibility, promotion and discount management, backorder management and lost sales tracking. This provides the insight you need to deliver superior customer service.

Advanced Inventory Management™

Advanced inventory management capabilities such as vendor managed inventory, consignment inventory management, flexible inventory reservations and other functionality that provides better visibility and control. Supports the needs of today's more volatile supply chains.

Advanced Business Intelligence™

Focused insight helps you to minimize complexity and maximize margins by supporting rapid, fact-based decisions rather than forcing your team to rely on guesswork or rules of thumb. Provides metrics tailored to the specific needs of a new generation of distributors and manufacturers.

> WHAT'S IN IT FOR YOU? INSIGHT. OPTIMIZATION. RESULTS.

Insight:

Sophisticated business intelligence tools and a complete view of your inventory, orders, financials, and management alerts helps your team keep up with the needs of a global supply chain by making better, more informed decisions faster than ever before.

Optimization:

Improve efficiency and deliver orders faster with automated workflows and streamlined, comprehensive business processes. You'll improve margins and customer satisfaction with smarter inventory planning decisions and more efficient shipping schedules.

Results:

Respond to the market, update prices, offer effective promotions and handle commissions, rebates and trade agreements, and Special Price Agreements with confidence and ease while improving your cash flow and building stronger customer and supplier relationships.

Microsoft Dynamics Global Independent Software Vendor

I.B.I.S., Inc. is a member of the elite Microsoft Dynamics® Global Independent Software Vendor program, an honor reserved for those partners who have demonstrated deep industry and functional expertise. IBIS has that expertise in global supply chain management, and they used that knowledge and experience to create one of the most flexible and advanced supply chain applications available today. In fact, Advanced Supply Chain Software™ is so well-respected that Microsoft Partners all over the world call on IBIS to help their clients resolve their most complex supply chain issues.
